# FORWARD LOOKING STATEMENTS

This presentation may contain “forward-looking statements” with the meaning of Canadian securities legislation. These statements can be identified by the use of words such as “expected”, “may”, “will” or similar terms.

Forward-looking statements are necessarily based upon a number of factors and assumptions that, while considered reasonable by Kootenay as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Many factors, known and unknown, could cause actual results to be materially different from those expressed or implied by such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date made. Except as otherwise required by law, Kootenay expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any such statements to reflect any change in Kootenay’s expectations or any change in events, conditions or circumstances on which any such statement is based.

Cautionary Note to US Investors: This presentation may contain information about adjacent properties on which we have no right to explore or mine. We advise U.S. investors that the SEC’s mining guidelines strictly prohibit information of this type in documents filed with the SEC. U.S. investors are cautioned that mineral deposits on adjacent properties are not indicative of mineral deposits on our properties. This presentation may contain forward-looking statements including but not limited to comments regarding the timing and content of upcoming work programs, geological interpretations, receipt of property titles, potential mineral recovery processes, etc. Forward-looking statements address future events and therefore involve inherent risks and uncertainties. Actual results may differ materially from those currently anticipated in such statements.

## **QUALIFIED PERSON STATEMENT**

The Kootenay technical information in this presentation has been prepared in accordance with the Canadian regulatory requirements set out in National Instrument 43-101 (Standards of Disclosure for Mineral Projects) and reviewed and approved on behalf Kootenay by James McDonald, P.Geo, President, CEO & Director for Kootenay, a Qualified Person.

## **CAUTION TO U.S. INVESTORS CONCERNING MEASURED, INDICATED or INFERRED RESOURCES**

This presentation includes Mineral Reserves and Mineral Resources classification terms that comply with reporting standards in Canada and the Mineral Reserves and the Mineral Resources estimates are made in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”). NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. These standards differ significantly from the requirements adopted by the U.S. Securities and Exchange Commission (the “SEC”). The SEC sets rules that are applicable to domestic United States reporting companies. Consequently, Mineral Reserves and Mineral Resources information included in this presentation is not comparable to similar information that would generally be disclosed by domestic U.S. reporting companies subject to the reporting and disclosure requirements of the SEC. Accordingly, information concerning mineral deposits set forth herein may not be comparable with information made public by companies that report in accordance with U.S. standards.

Kootenay Silver Inc. has a leading growth profile highlighted by **one of the largest junior owned silver asset bases in Mexico.**

## REASONS TO BUY

- SIGNIFICANT LEVERAGE TO SILVER PRICE
- EXPLOSIVE GROWTH POTENTIAL THROUGH HIGH GRADE DRILL DISCOVERIES
- POTENTIAL FOR VALUE RE-RATING

✓ HIGH GRADE DRILL DISCOVERIES

- **Columba** Silver Property

✓ RESOURCE PROPERTIES

- 136 Million ounces Ag equivalent (AgEq) M+I & 35 Million ounces AgEq Inferred\*
- Hosted on **Promontorio-La Negra** & **La Cigarra** Properties

✓ SUCCESSFUL GENERATIVE PORTFOLIO

- Early-stage drilling at **Cervantes Gold-Copper Property**
  - Sold interest to Aztec Minerals for 10M Shares and 0.5% NSR

\* Full Resource Tables for La Cigarra and Promontorio can be found on slide 30 and 33 in the Appendix to this presentation. Numbers differ from previous presentations as they incorporate recovery factors for the silver equivalent calculations. Silver Equivalency is based on metals recoveries outlined on slide 30 and 33.

# LOCATION OF PRIMARY SILVER ASSETS

Famous Sierra Madre Trend  
Depicted by Red Line

*The information is not necessarily indicative of future mines or mineralization and is provided as background and context material for the reader showing historical production numbers along the Sierra Madre mineral trend*

## Recent Milestones

- ✓ **22 Sep 2022** Reports High Grade on last of 135 drill holes and 27,000 meters drilled to that date
- ✓ **1 Dec 2022** – Kootenay Silver Appoints New Vice President of Exploration
- ✓ **8 May 2023** – Kootenay Silver Decreases Holdings in Aztec Minerals
- ✓ **24 May 2023** Closing of 3.7 Million Private Placement
- ✓ **13 Jun 2023** 100% Ownership of Columba
- ✓ **9 Aug 2023** First 43-101 Report Filed on Columba
- ✓ **6 Sep 2023** New Phase of Drilling at Columba Initiated

## 2023 Catalysts

### **Columba**

- Initiated staged 50,000m drill program
- Stage I and II to culminate in maiden resource
- Continuous news flow

### **Cervantes – Aztec Minerals**

- Hold 7.6M shares and 0.5% NSR
- Successful sale from generative portfolio

### **Promontorio**

- Resource update to include La Negra discovery

# **Primary Catalyst for 2023 Columba Drill Program**

# COLUMBA HIGH GRADE SILVER PROJECT

## HIGHLIGHTS

- High-grade vein system with **no exploration in ~40 years**
- **Past producing silver mine (~1900-1910; 1958-1960)**
- Multiple high-grade targets identified by drilling
- 17.8 meters of 650 gpt silver; 6 meters of 2035 gpt silver; 34.45 meters of 540 gpt silver etc.

## EXPLORATION WORK COMPLETED

- **2019 – 2022**- 27,000 meters drilled in 135 holes
- F vein returns consistent silver across 700 meters of length and 200 meters of depth
- Multiple veins with high grade and multi meter widths

## WORK PLANNED FOR 2023

- Start of multi-stage 50,000m drill program 2023
- Stage I and II to culminate in maiden resource

Detailed results for all drill holes drilled to date can be viewed by clicking the following link: [COLUMBA DRILL RESULTS](#)

# COLUMBA VEIN HIGHLIGHTS

## Columba Project >100 M Silver Ounce Potential

- Classic Mexican epithermal vein system comprising multiple veins over an area 3 km x 4 km
- 27,277 meters drilled to date in 135 holes
- Multiple veins remain open in all directions
- Multi-stage 50,000-meter drilling program planned to test new mineralized zones and extend high priority veins

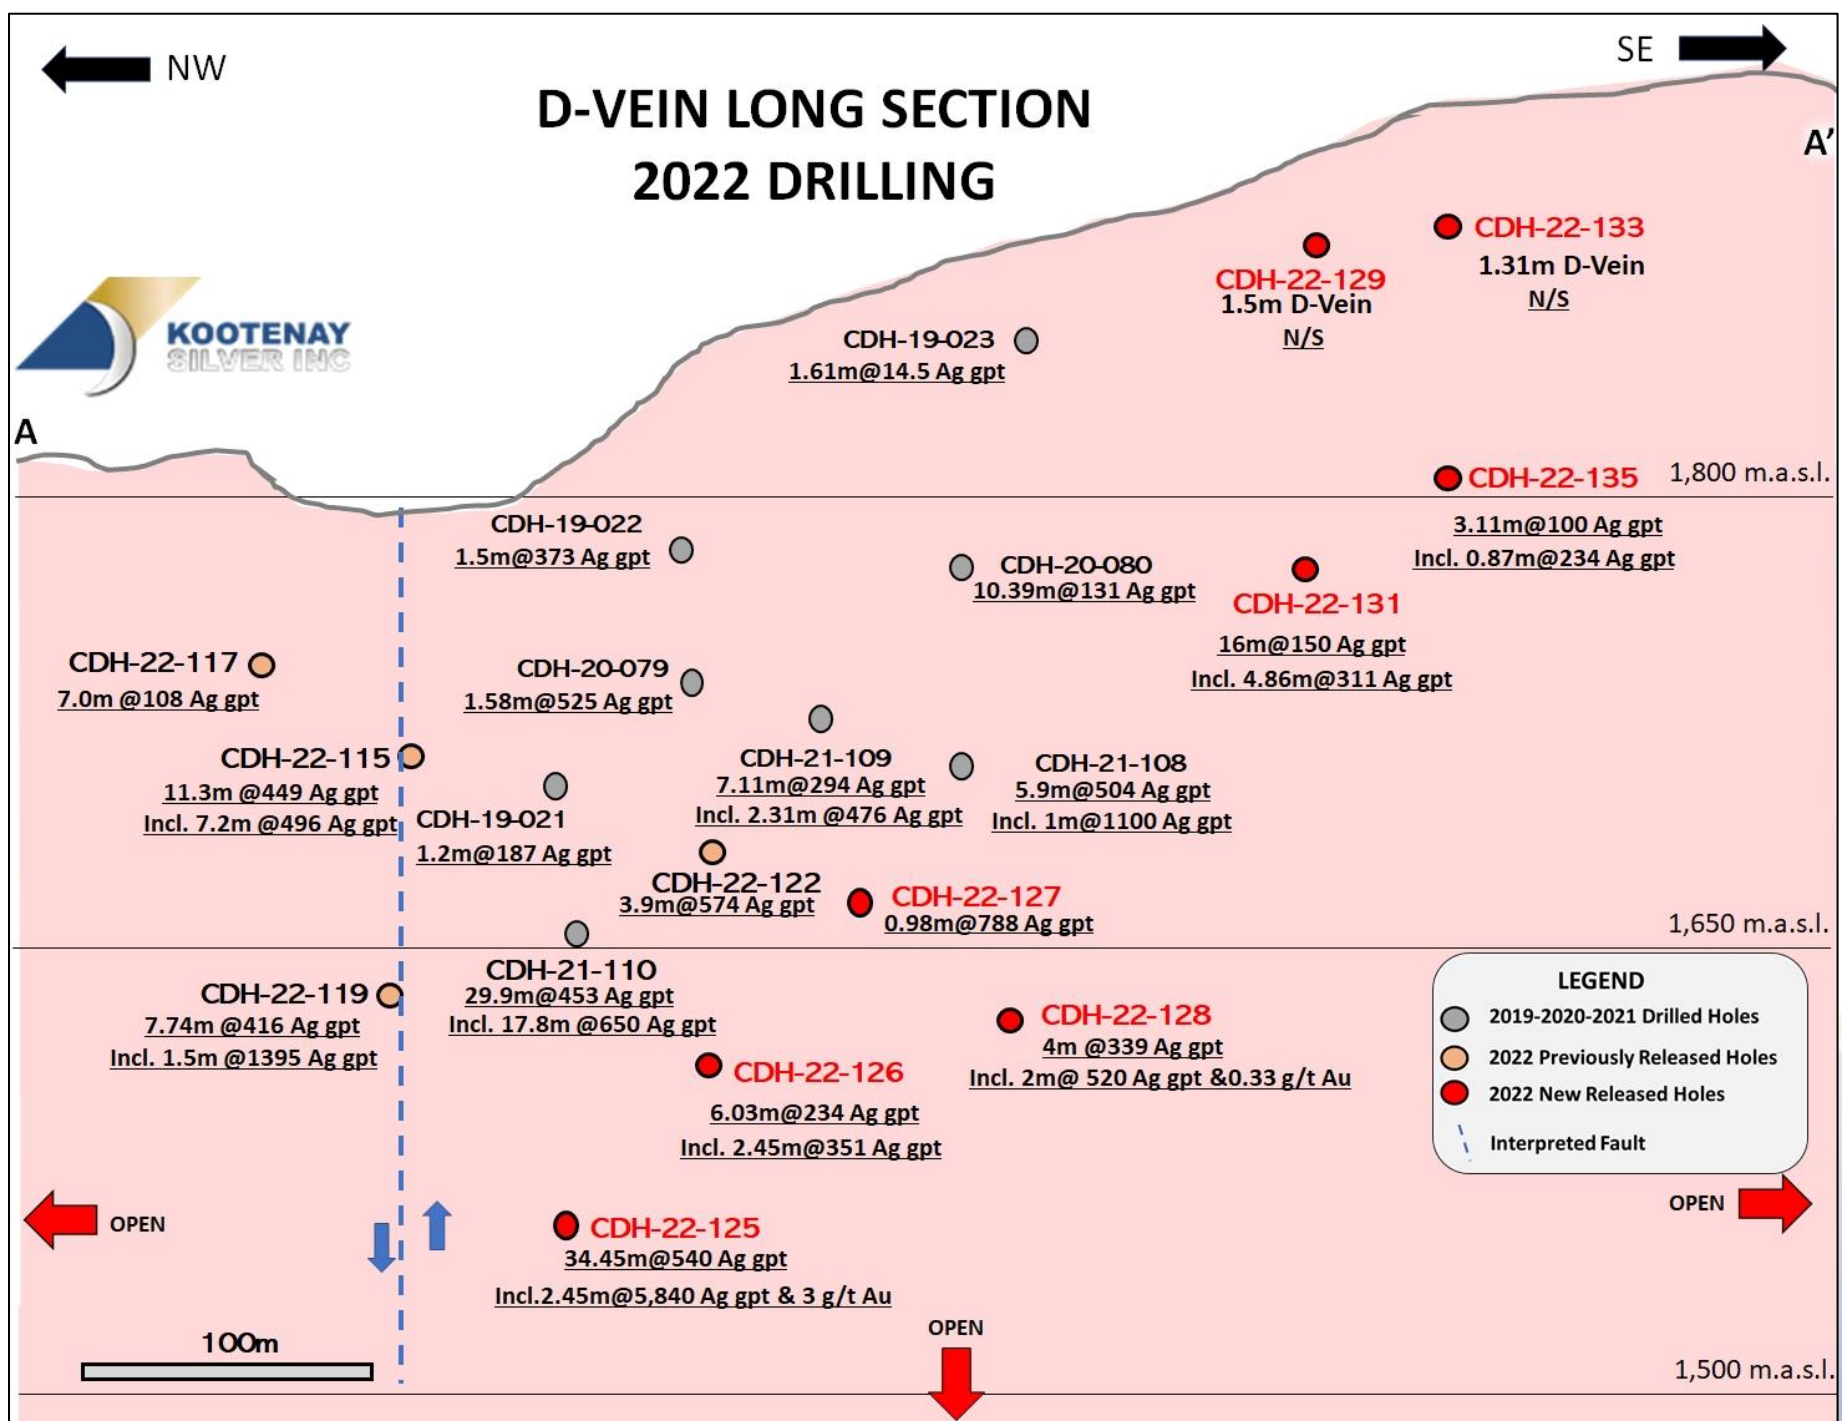

High grade core from hole CDH-20-110

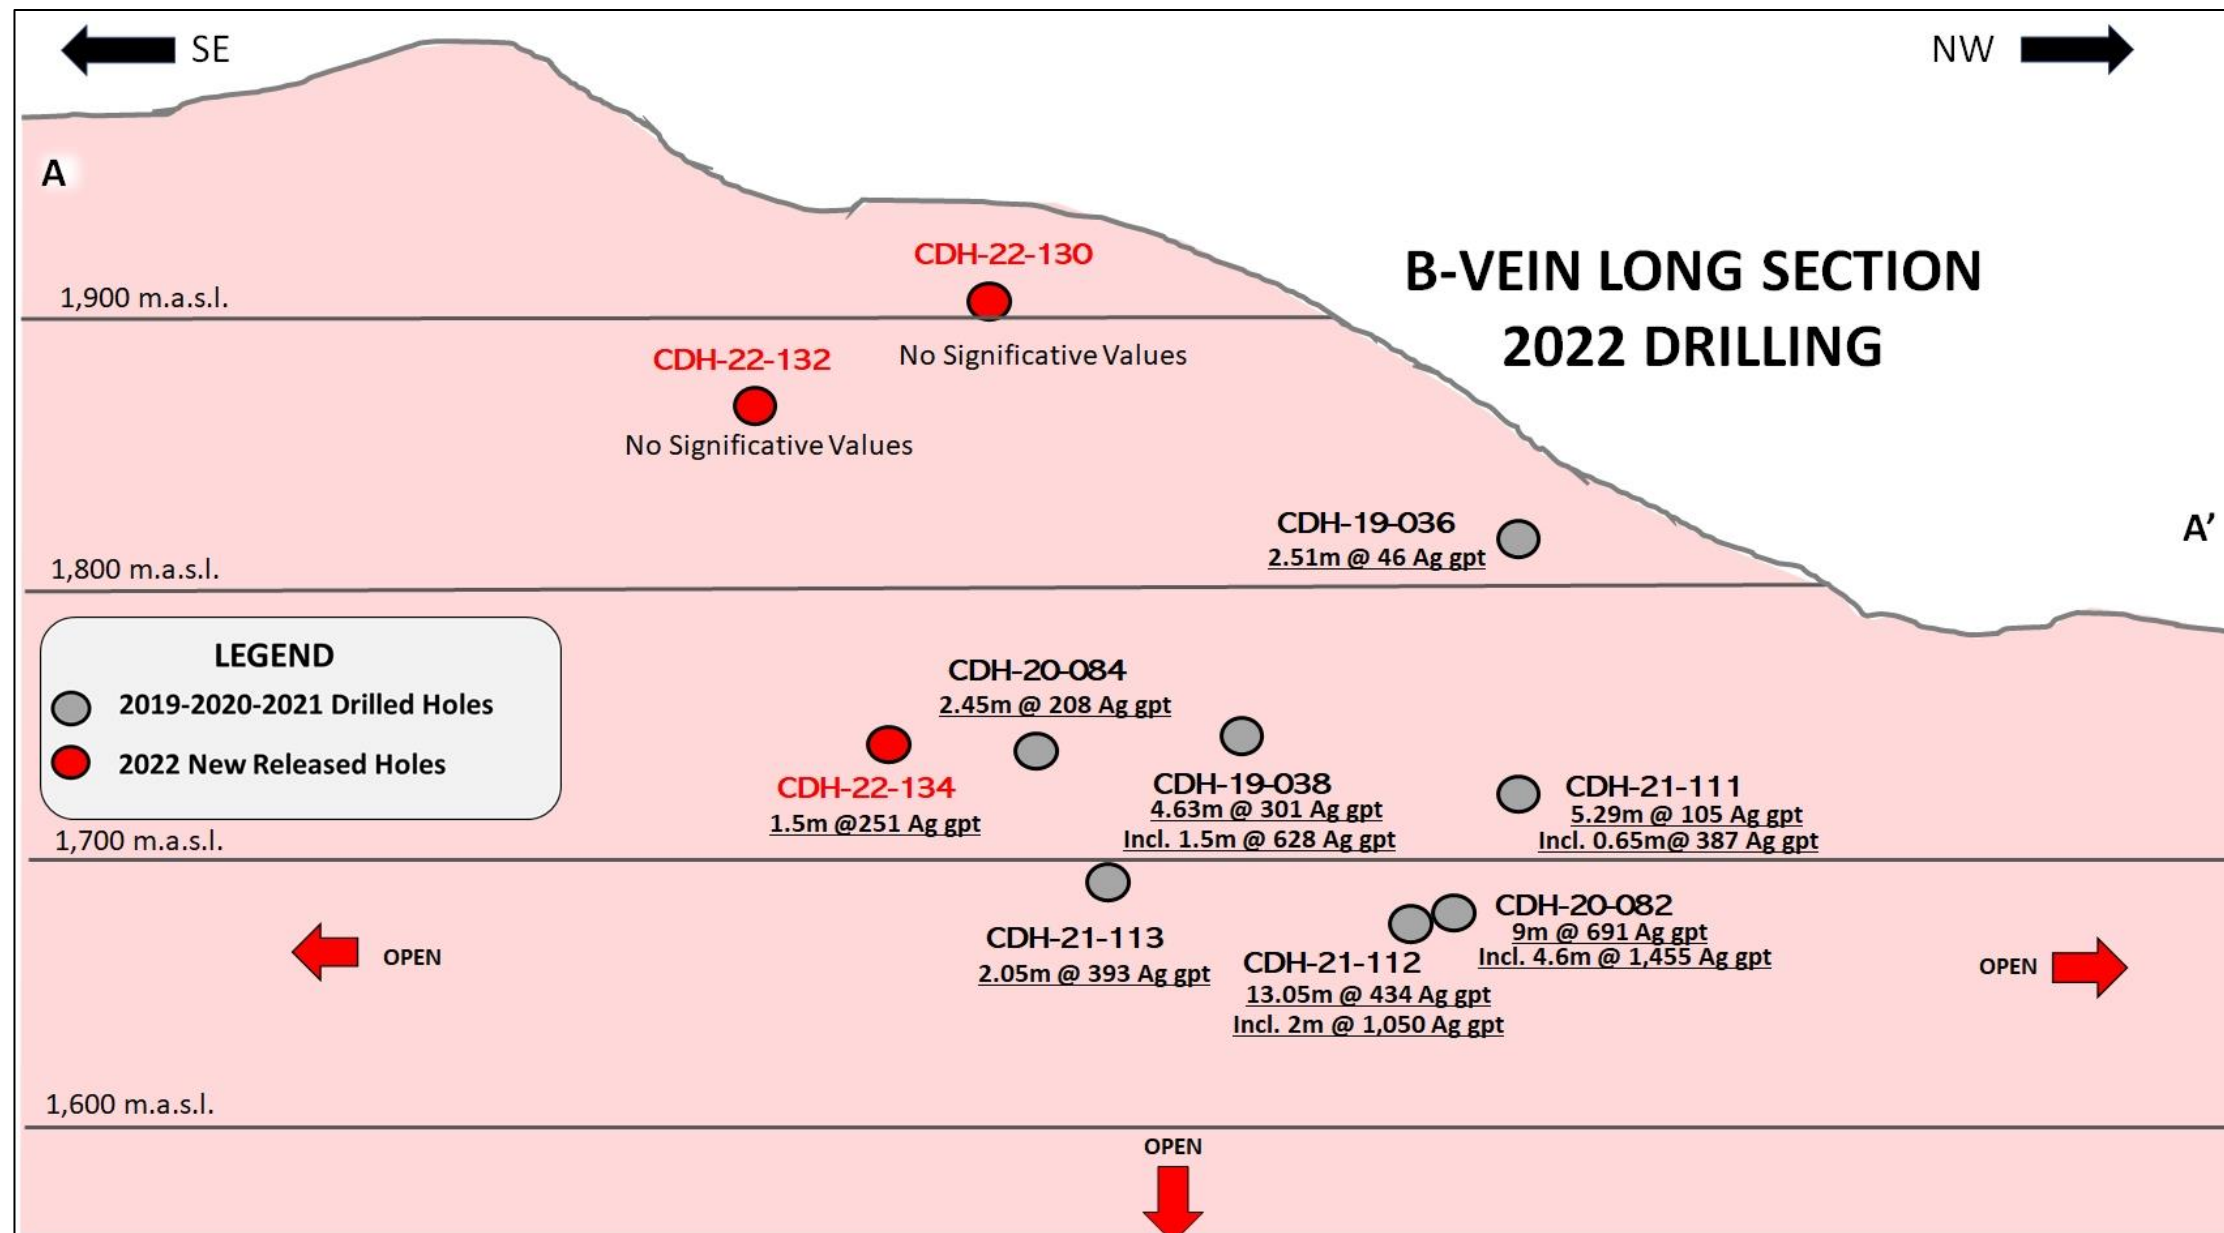

**A'**

# What is Next?

- A 12 to 15 Hole program of 3000 + meters to expand on D Vein high grade
- A follow up program of 20,000 + meters to culminate in Maiden Resource for Q3, 2024\*

\* Subject to Financing

## D-Vein Long Section

Prop Drilling Sep 2023

- Initial 12 to 15 holes of a proposed 3,000 to 5,000m drilling program
- Drill holes designed to step out on 50m to 100m centers to expand on high grade intercepts
- Follow up aggressively step out along the vein at 100m centers

# D-Vein Long Section

## Proposed Drilling Sept 2023 plus Proposed Follow Up Holes

- Follow up of initial 3,000 to 5,000m program, 100m step outs designed to extend D Vein
- Drill holes designed to intersect D Vein at optimal elevation for mineralized zone
- Step out drilling expected to encounter B Vein and parallel veins at eastern extent

# COLUMBA PROJECT

## Exploring a District-Scale Vein System with a Staged Drilling Program

**KOOTENAY**  
SILVER INC

### Staged Drilling of 50,000 meters

- **Stage I, Initial 12 to 15 holes.**  
Focus on expanding D Vein high grade with 50 to 100m stepouts
- **Stage II, 20,000 + meters.**  
Includes step out drilling mainly on D Vein at 100m centers (~7000m, 20 holes) followed by infill drilling culminating in maiden resource in Q 3 2024.
- **Stage III, 25,000 meters.**  
Definition and expansion drilling to advance to and initiate PEA

# **Secondary Catalysts Resource Modeling**

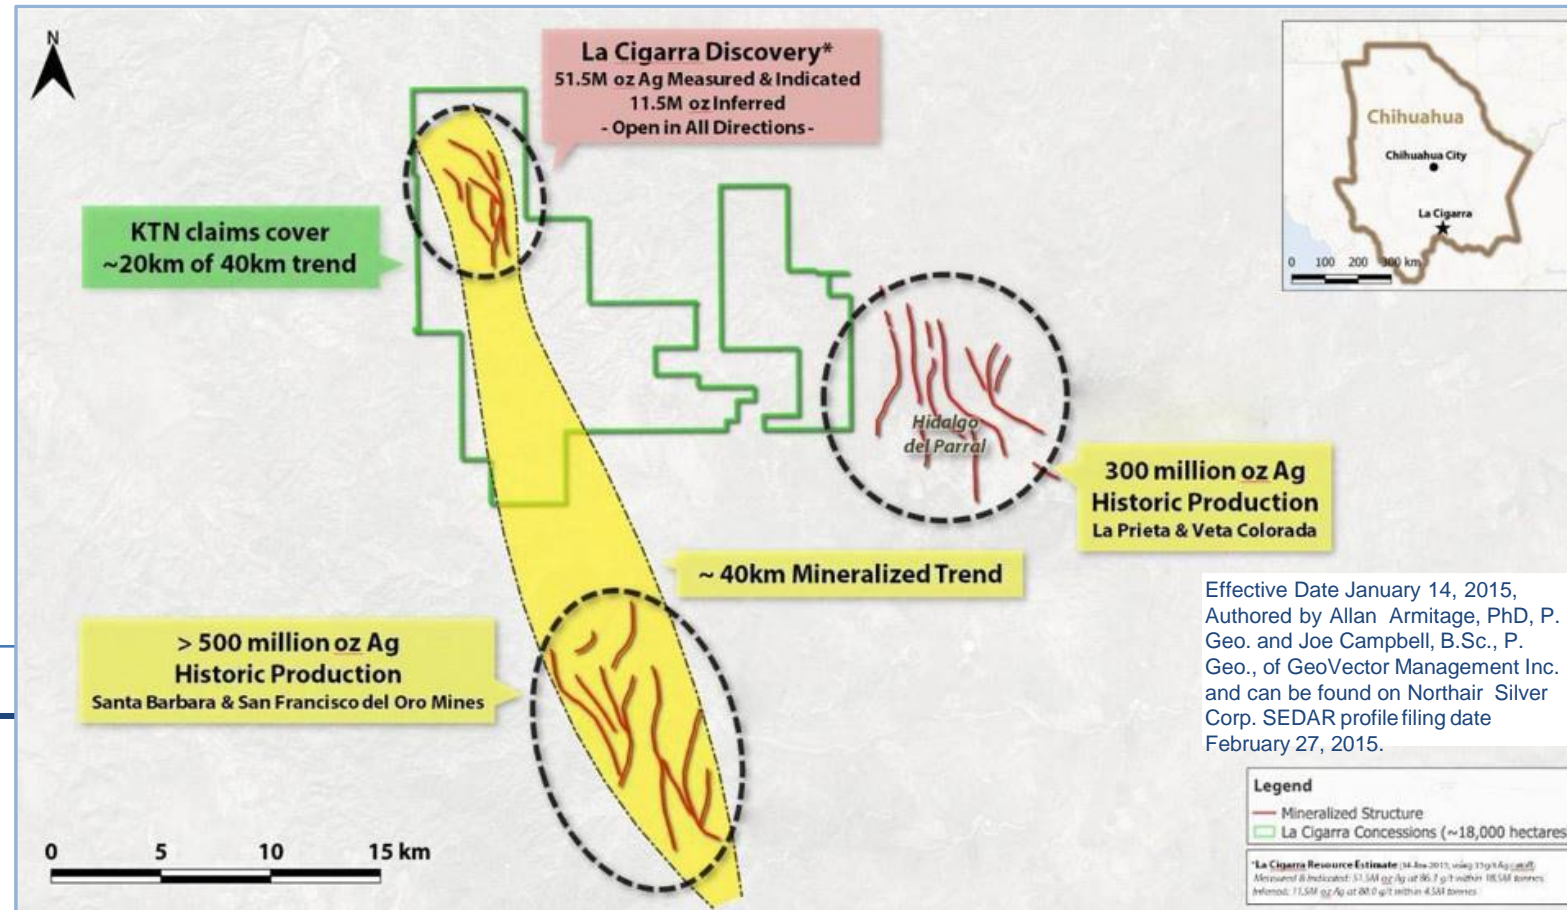

# LA CIGARRA - PARRAL SILVER DISTRICT

## HIGHLIGHTS

- La Cigarra silver project is located in the renowned Parral Mining district in Chihuahua State, Mexico
- Significant land package (over 18,000 hectares)
- Resource open in all directions
- Multiple drill targets.
- **New geologic model indicates potential for resource grade increase.**

La Cigarra (2015)*	Tonnage	Grade	Contained
<b>Resources</b>			
• M&I	18.5 Mt	86.3 gpt Ag	51.5 Moz Ag
• Inferred	4.5 Mt	80.0 gpt Ag	11.5 Moz Ag

Effective Date January 14, 2015,  
Authored by Allan Armitage, PhD, P.  
Geo. and Joe Campbell, B.Sc., P.  
Geo., of GeoVector Management Inc.  
and can be found on Northair Silver  
Corp. SEDAR profile filing date  
February 27, 2015.

\* NI 43-101 Technical Report on the Updated Mineral Resource Estimate on the San Gregorio/Las Carolinas Zones, La Cigarra Silver Project, Chihuahua, Mexico", effective date January 14, 2015 prepared by GeoVector Management Inc.. Mineral resources are reported in relation to a conceptual pit shell at a silver cut-off grade and a \$22/oz silver price and considers metallurgical recoveries of 84% silver.

## HIGHLIGHTS

- Situated on Promontorio Mineral Belt Property. Hosts two major silver discoveries: Promontorio & La Negra
- Numerous additional targets within a 6.5km x 15km area

Promontorio (2013)*	Tonnage	Grade	Contained
In-Pit Resources			
• M&I	44.5 Mt	58.7 gpt AgEq	84.0 Moz AgEq
• Inferred	14.6 Mt	46.3 gpt AgEq	21.7 Moz AgEq
Underground Potential			
• M&I	0.2 Mt	53.3 gpt AgEq	0.4 Moz AgEq
• Inferred	1.3 Mt	55.6 gpt AgEq	2.3 Moz AgEq

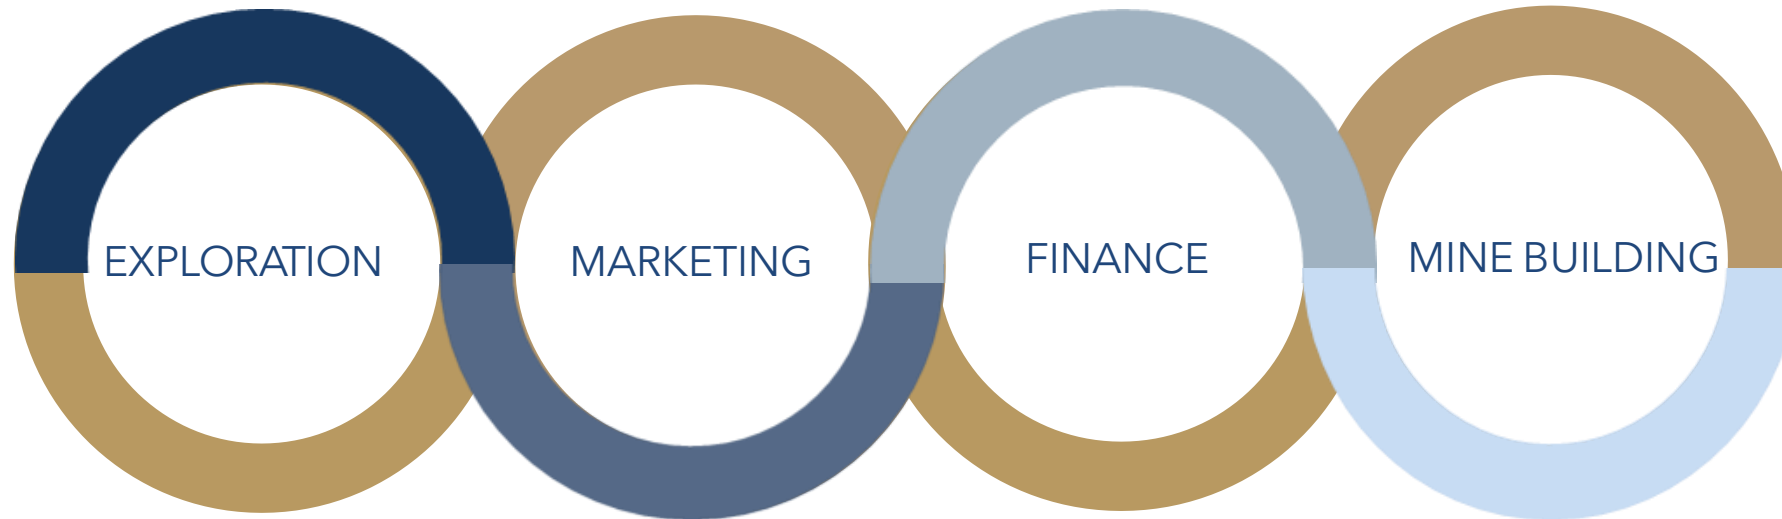

## LA NEGRA

- **Geologic modeling in preparation of initial resource estimate**
- 156 gpt Ag over 200m, 1,338 gpt Ag over 6m, 420 gpt Ag over 50m

\* "NI 43-101 Technical Report on Resources, Promontorio, Mexico", Report by SRK Consultants Inc. Effective date March 31, 2013. Calculated a pit-constrained cut-off of 20 gpt AgEq, and an underground cut-off of 45 gpt AgEq using a \$31/oz silver price. AgEq calculated using \$31/oz Ag, \$1,650/oz Au, \$0.96/lb Pb, \$0.89/lb Zn and mill recovery of 74%, 70%, 81% and 88% respectively. Full resource table found in the appendix section of this presentation. Silver equivalent values are calculated using the above noted recoveries and prices for all metals.

## Classic Zoned Vein System Model

- Stronger grade with depth until reaching Higher Grade Zone (~Mine Level 3)
- Model supported by 2018 surface sampling/observations as well as historical mine sampling\*

## Exploration/Drilling Plan

- Determine where Higher Grade level is, project outwards and drill

\*The Company cautions that a qualified person has not done sufficient work to verify the historical sampling data and has not substantiated any data as it pertains to the Property; therefore, the reader should not rely upon such historical grades. The information is not necessarily indicative of mineralization on the Property and is provided as background and context material for the reader. The Company is treating the historical sampling data as a guideline to determining potential future exploration programs.

# D VEIN

High grade hits flanked by mineralized stockwork and breccia, great continuity both to depth and along strike

- D Vein has been drilled for 435 meters to a vertical depth of 300 meters
- Undrilled trace of D Vein adds 800m for a potential strike length of over 1,200 meters.
- High grade is flanked by broad zones of stockwork veining resulting in wide blocks of mineralization

High grade core from hole CDH-20-110

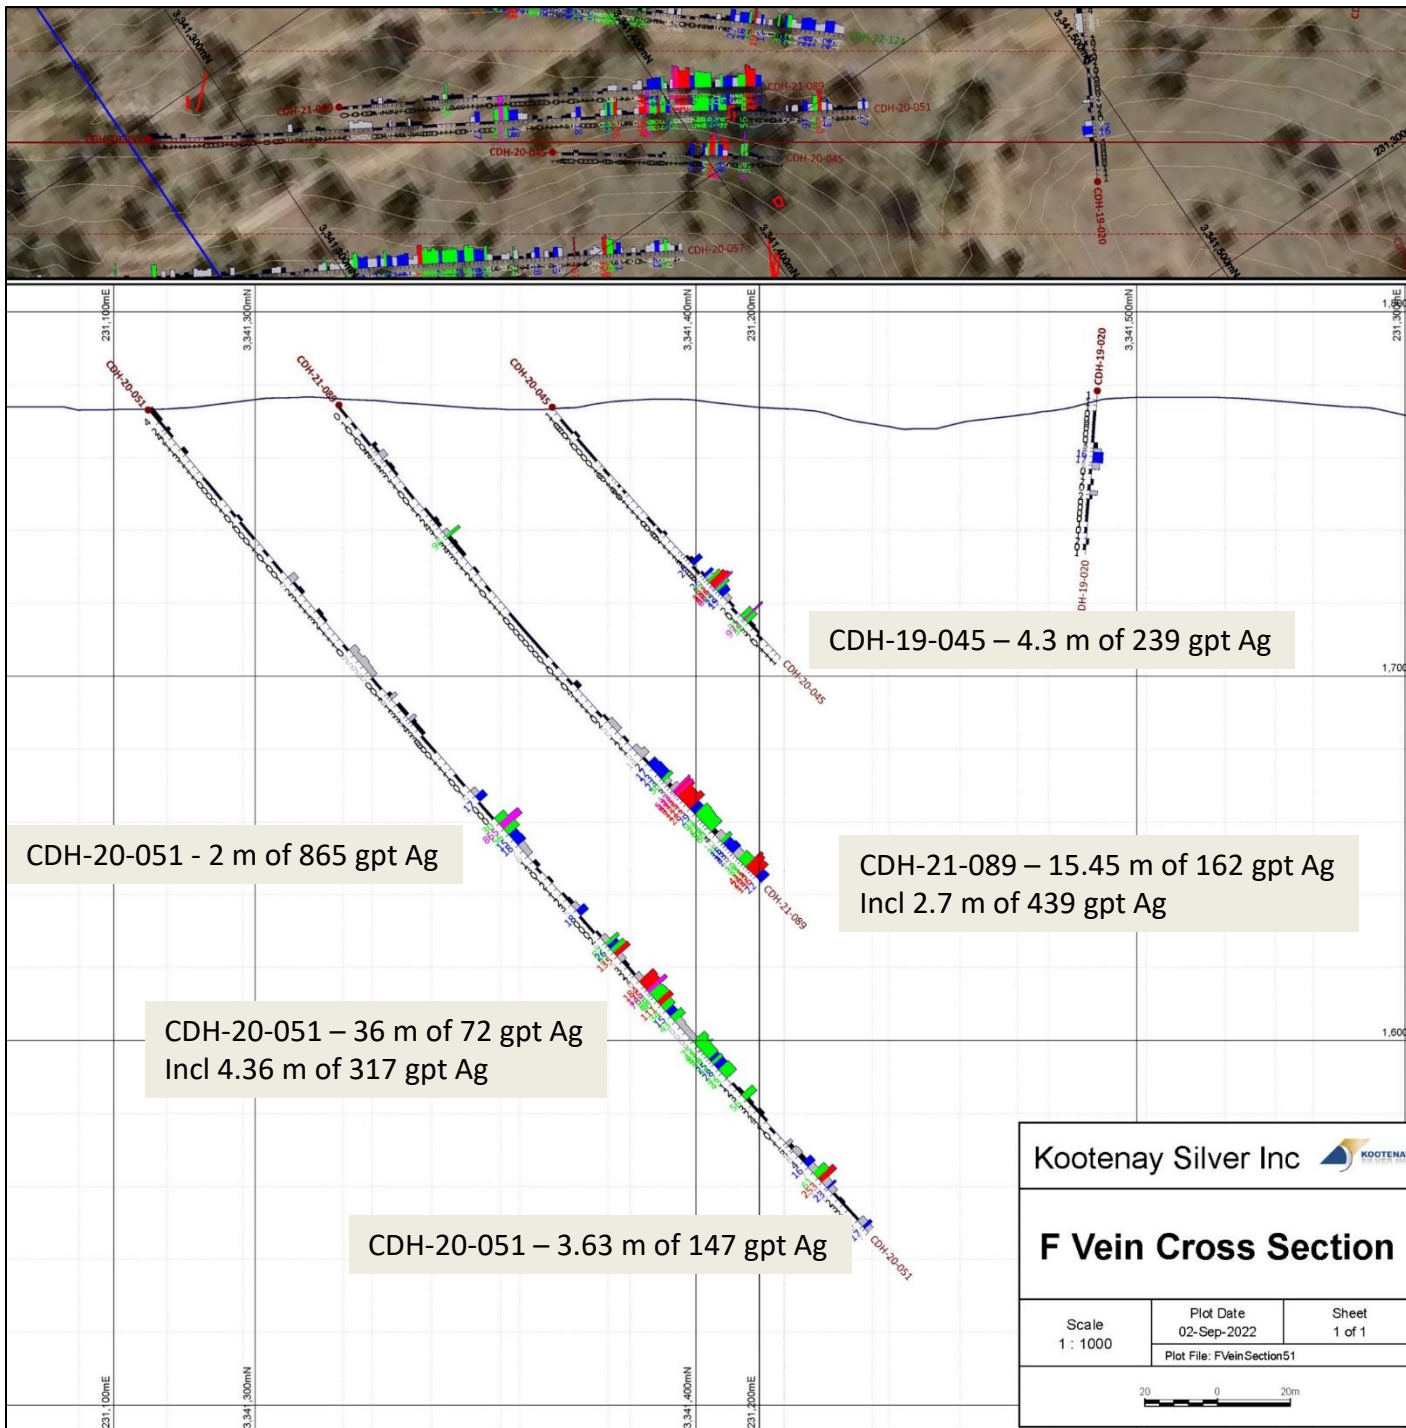

## F VEIN

Extensive vein with wide mineralized intervals,  
great continuity along trend

- Kootenay Silver has drilled F Vein has been over a distance of 770 meters and to a vertical depth of 275 meters
- F Vein mapping indicates a length of over 3.8 kilometers
- Sampling from u/g workings and drilling assays suggest classic epithermal zoning typical of similar mineral systems worldwide
- Historical underground mining focused on F Vein, the main working saw six levels developed

Inferred	4,450,000	80.0	0.058	0.13	0.16	11,460,000	8,000	12,680,000	15,610,000

*Note:\** Mineral resources are reported in relation to a conceptual pit shell at a 35 g/t silver cut-off grade and a \$22/oz silver price. Mineral resources that are not mineral reserves do not have demonstrated economic viability. All figures are rounded to reflect the relative accuracy of the estimate and numbers may not add up due to rounding.

Resource Statement for the La Cigarra silver project located in Chihuahua State, Mexico: GeoVector Management Inc., Effective Date January 14, 2015, Authored by Allan Armitage, PhD, P. Geo. and Joe Campbell, B.Sc., P. Geo., of GeoVector Management Inc. and can be found on the Northair Silver Corp. SEDAR profile dated February 27, 2015.

The resource estimate was calculated based on results from 156 of 173 holes totaling 27,617 metres drilled along the open ended La Cigarra mineralized system which has a defined strike length of at least three (3) kilometres. The 156 holes included in the Property's resource estimate were positioned within a potentially surface minable area comprised of the San Gregorio and Las Carolinas mineralized zones, which combined form a total strike length of 2.4 kilometres. The resource estimate was constrained by a constrained pit shell utilizing a **\$22 /oz** silver price and reported at a **35 g/t** silver cut-off grade, and considers metallurgical recoveries of 84% silver. A summary of the mineral resource estimate is listed below:

# LA CIGARRA RESOURCE

Notes: \* Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the Mineral Resources estimated will be converted into Mineral Reserves.

1 Silver equivalency amounts are calculated incorporating metals prices and mill recoveries for silver, gold, lead and zinc. See note 3 .

2 Open pit resources stated as contained within a potentially economically minable pit shell;

3 Pit optimization is based on assumed silver, gold, lead, and zinc prices of \$31/oz, \$1650/oz, \$0.96/lb, and \$0.89/lb respectively, mill recoveries of 74%, 70%, 81% and 88% respectively, a 1.5% NSR, Estimated mining costs of \$1.20/t, and estimated processing and G&A cost of \$12.00/t; and an estimated POX cost of \$2/tonne (\$30/tonne of pyrite concentrate)

4 Break-even cut-off grades used were 20 g/t AgEq for open pit mill material and 45 gpt AgEq for underground material;

5 Mineral resource tonnage and contained metal have been rounded to reflect the accuracy of the estimate, and numbers may not add due to rounding

# CERVANTES GOLD-COPPER PROJECT

**KOOTENAY**  
SILVER INC

## HIGHLIGHTS

- Successful sale of property from generative portfolio to Aztec Minerals
- KTN owns 7.6M shares in Aztec @ \$0.25 and 0.5% Net Smelter Return Royalty
- 3,500+ hectare porphyry gold-copper property in Sonora State, Mexico
- Potential to host a large gold/copper deposit
- **2022 drilling highlights**
  - 1.49 gpt Au over 136.8m incl. 3.42 gpt Au over 51.7m
  - 1.0 gpt Au over 167m incl. 4.2 gpt Au over 24.4m
  - 1.5 gpt Au over 136.8m incl. 3.4 gpt Au over 52m
