## FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2021 MANAGEMENT DISCUSSION AND ANALYSIS

---

### DATE

This Management Discussion & Analysis (“MD&A”) of Kootenay Silver Inc. and its subsidiaries (referred to as the “Company” or “Kootenay”) was prepared by management as at November 9, 2021 and was reviewed and approved by the Board of Directors of Kootenay. The following discussion of performance, financial condition and future prospects should be read in conjunction with the consolidated interim financial statements for the three and nine months ended September 30, 2021 and the audited consolidated financial statement for the year ended December 31, 2020 and 2019, and notes thereto (the “Financial Statements”), which have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”). The information provided herein supplements but does not form part of the Financial Statements. This discussion covers the three and nine months ended September 30, 2021, and the subsequent period up to the date of issue of this MD&A. Additional information relating to the Company is available at [www.sedar.com](http://www.sedar.com).

The Company has prepared this MD&A following the requirements of National Instrument 51-102 (“NI-51-102”). These statements are filed with the relevant regulatory authorities in Canada. All currency amounts are expressed in Canadian dollars unless otherwise noted.

Unless otherwise indicated the technical disclosure contained within this MD&A has been reviewed and approved by Kootenay's President & CEO, James McDonald, P. Geo (a qualified person for the purpose of National Instrument 43-101 (“NI 43-101”), Standards of Disclosure for Mineral Projects). Mr. McDonald is also a director of Kootenay.

### Forward-Looking Information

This MD&A contains “forward-looking information” within the meaning of Canadian securities legislation and “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995 (collectively, “forward-looking statements”). All statements, other than statements of historical fact, which address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future are forward-looking statements. Forward-looking statements contained in this MD&A include, but are not limited to, statements with respect to anticipated developments in the Company’s continuing and future operations, the adequacy of the Company’s financial resources and financial projections; statements concerning or the assumptions related to the estimation of mineral resources, methodologies and models used to prepare resource estimates; the conversion of mineral properties to resources; the potential to expand resources; future exploration budgets, plans, targets and work programs; development plans; activities and timetables; grades; metal prices; exchange rates; results of drill programs; environmental risks; political risks and uncertainties; unanticipated reclamation expenses; statements about the Company’s plans for its mineral properties; acquisitions of new properties and the entering into of options or joint ventures; and other events or conditions that may occur in the future.

Forward-looking statements are frequently, but not always, identified by words such as “expects,” “anticipates,” “believes,” “intends,” “estimated,” “potential,” “possible” and similar expressions, or statements that events, conditions or results “will,” “may,” “could” or “should” occur or be achieved. Forward-looking statements are statements concerning the Company’s current beliefs, plans and expectations about the future and are inherently uncertain, and actual achievements of the Company or other future events or conditions may differ materially from those reflected in the forward-looking statements due to a variety of risks, uncertainties and other factors, including, without limitation, the risks that: (i) any of the assumptions in the resource estimates turn out to be incorrect, incomplete, or flawed in any respect; (ii) the methodologies and models used to prepare the resource estimates either underestimate or overestimate the resources due to hidden or unknown conditions, (iii) operations are disrupted or suspended due to acts of god, internal conflicts in the country of Mexico, unforeseen government actions or other events; (iv) the Company experiences the loss of key personnel; (v) the Company’s mine operations are adversely affected by other political or military, or terrorist activities; (vi) the Company becomes involved in any material disputes with any of its key business partners, lenders, suppliers or customers; or (vii) the Company is subjected to any hostile takeover or other unsolicited attempts to acquire

control of the Company. Other factors that could cause the actual results to differ materially from current expectations include market prices, exploration success, continued availability of capital and financing, inability to obtain required regulatory approvals and general market conditions, as well as those risks described under the heading “RISKS AND UNCERTAINTIES” below. These forward-looking statements are based on a number of assumptions, including assumptions regarding general market conditions, the timing and receipt of regulatory approvals, the ability of the Company and other relevant parties to satisfy regulatory requirements, the availability of financing for proposed transactions and programs on reasonable terms and the ability of third-party service providers to deliver services in a timely manner. The Company’s forward-looking statements are based on the beliefs, expectations and opinions of management on the date the statements are made, and the Company assumes no obligation to update such forward-looking statements in the future, except as required by law. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. For the reasons set forth above, investors should not place undue reliance on the Company’s forward-looking statements.

## **DESCRIPTION OF BUSINESS**

The Company is an exploration stage mining company involved in the exploration and development of mineral properties in Mexico and Canada. The Company is classified as a Tier One issuer on the TSX Venture Exchange (“TSX-V”) and its common shares are listed and trade under the symbol ‘. The management and technical team have extensive experience in mineral exploration, development and mining, public company management and operations and Canadian venture capital markets.

## **OBJECTIVES AND STRATEGY**

The primary objective and business plan of the Company is to discover or acquire silver dominant mineral deposits that have the potential to become economically viable for further development. The Company assesses financial, technical and market risk associated with a particular project before deciding whether to advance the project with its own capital or share the risk by optioning all or a portion of the project to a partner to conduct further exploration work or to provide funding to advance the project. If a project demonstrates potential to be economically viable via completion of a preliminary economic assessment, prefeasibility or feasibility study then it will be moved to a production decision and, when appropriate, funding will be sought to build a mine through traditional mine finance sources, joint venture or sale of the company or project. The rate at which a given project is advanced is dependent on several factors including management’s assessment of project and the risks of development, including the probability of discovery and potential economic viability based on past work, results of additional drilling, resource estimates, metallurgy, environmental impact, community involvement to operate and permitting among others. It is also strongly influenced by access to capital to advance the various stages of assessment. When markets for commodities are favorable towards precious metals and exploration then capital is more accessible, allowing the Company more flexibility in the balance between advancing select projects while maintaining a 100% interest and seeking partner funded programs on other projects through option or joint venture agreements. When markets are not favorable towards equity investment more emphasis is given to seeking funding through option or joint venture agreements to advance projects for ongoing development.

The Company has been successful in discovering mineral resources through grassroots exploration with two significant silver discoveries on its Promontorio property in Sonora, Mexico, namely Promontorio and La Negra.

Since the acquisition of the La Cigarra Project, the Company had focused its financial resources and management effort on expanding the resource size and delineating further discoveries within the project. Due to lower silver prices, commencing in 2018, the Company began to focus on targets with the potential for high grade discoveries. In late 2018, the Company entered into an option agreement to acquire two properties with such potential, namely the Columba Project (“Columba”) in Chihuahua State, Mexico and the Copalito Property (“Copalito”) in Sinaloa State, Mexico. Both of which are classic epithermal vein systems demonstrating potential for discovery of high-grade resources.

In early 2021, a fully funded 5,000 and 3,500-meter drilling program commenced on the Columba and Copalito projects, respectively both programs are now completed and results are pending from the remaining drill holes.

## OVERVIEW OF PERFORMANCE - 2021

The Company commenced a 5,000-meter drill program on Columba project and a 3,500-meter drill program on the Copalito project (see news release dated March 3 and March 25, 2021 for further details). The two programs were completed subsequent to September 30, 2021, with certain drill hole results pending at the date of this MD&A.

On January 26, 2021, the Company announced an exploration program approved by the Cervantes Joint Venture (Joint Venture with Aztec Minerals). A two-phase, \$1.13 million CDN exploration program is planned in 2021 for the Cervantes porphyry gold-copper property in Sonora, Mexico.

The JV completed in the in the first quarter Phase 1, being a \$85,000 program of soil and rock sampling and geological mapping (approximately 525 soils and 150 rocks having been analyzed) to extend the 100 by 100 meter geological and geochemical grid to the north, west and east boundaries of the property. Mapping focused on detailed lithological, structural, and alteration mapping of the California, California North, and Estrella targets. Subsequent to September 30, 2021, the JV announced the initiation of Phase 2, a 22 hole, 5,000m reverse circulation (“RC”) drill program. Four main targets will be tested 1) California; 2) California North prospect; 3) Jasper prospect; and 4) Purisima East target. The focus of the program is to better define the open pit, heap leach gold potential of the porphyry oxide cap at California, evaluate the potential for deeper copper-gold porphyry sulfide mineralization underlying the oxide cap, test for north and west extensions of the California mineralization at California North and Jasper, and assess the breccia potential of Purisima East.

On March 30, 2021, the Company announced that it had signed an option agreement with Centerra Gold (KB) Inc. a wholly owned subsidiary of Centerra Gold Inc, whereby Centerra was granted an option to earn a 70% interest in the Two Times Fred property located in the Nechako Plateau of Central British Columbia. Under the terms of the option a total of C\$6 million in exploration expenditures and C\$500,000 in cash payments must be incurred and made over a four-year period for Centerra to earn a 70% interest. The first year requires a work expenditure of \$1 million with a minimum commitment of \$650,000. Upon the fulfillment of these conditions, the two companies will enter a standard joint venture agreement with Kootenay retaining a 30% interest, and funding of further work will be done on a pro rata basis amongst the joint venture partners (see news release dated March 30, 2021 for further details). Subsequent to September 30, 2021, Centerra announced assay results were returned from the 2021 Phase 1 exploration drilling program; this included four drill holes, three of which were drilled in the northern part of the project area. Drilling in Phase 1 tested two sections within a low-sulfidation epithermal gold system, an interpreted mid-zone and a shallow zone separated by 1.7 kilometres along strike direction.

Several holes intersected multiple zones of elevated, but subeconomic gold and silver values associated with anomalous antimony, arsenic, and mercury. These intervals include quartz veins up to 20 cm wide with banded, colloform, and minor bladed carbonate texture. Mineralization includes thin bands of sooty sulfide in veins and quartz-cemented breccia, or within silicified fault breccia with quartz vein fragments. These veins underlie a near surface pseudo-sinter environment.

The 2021 Phase 2 drilling program began late in the third quarter. The program is expected to comprise 2,000 to 3,000 meters of drilling in up to 11 drill holes. As of September 30, 2021, three drill holes totaling 861 meters, had been completed. Drilling tested for veins in the Borrow Pit zone in the southern part of the project area, and the Saki vein zone, in the mid part of the project area, where kaolinite clay alteration was identified at surface. Additional exploration activities at Two Times Fred included a controlled-source audio frequency magnetotellurics survey. A total of 27 line-kilometres were completed in six new lines and four existing line extensions.

On July 7, 2021, the Company announced the appointment of Hans Smit, P.Geo, as Technical Advisor where he will advise the Company with economic valuations on projects. The Company is working to update the mineral resource estimations and evaluate the potential economics of the Company’s two most advanced projects, La Cigarra and La Negra (Promontorio). Mr. Smit is well known for his experience and expertise in advancing projects from resource estimation through to feasibility and construction. Additionally, the Company granted under its share option plan, 650,000 share purchase options to an employee and consultant. Each option is exercisable for five years at a price of \$0.265.

On July 24, 2021, the Company announced that Blue Coast Research Ltd. had been contracted to conduct metallurgical testing to assess the best recovery process for La Negra project mineralization, situated 7 km north of the Company’s Promontorio Resource located in the state of Sonora, Mexico. Testing results will be used by the Company to advance La Negra along the path towards an initial mineral resource estimate and a preliminary economic assessment (PEA). Work will include:

- Sample characterization including QEMSACN mineralogy.
- Bond Ball Work Index test and grind calibration testing.
- Cyanidation Testwork including kinetic bottle roll and coarse kinetic bottle roll tests.
- Flotation Testwork including bench scale rougher floatation tests and a locked cycle test.

The purpose of the above tests is to determine recovery of La Negra silver mineralization, whether a saleable silver bearing lead concentrate can be produced and perform further leach tests to help determine an optimum flow sheet (recovery process) needed for economic evaluation.

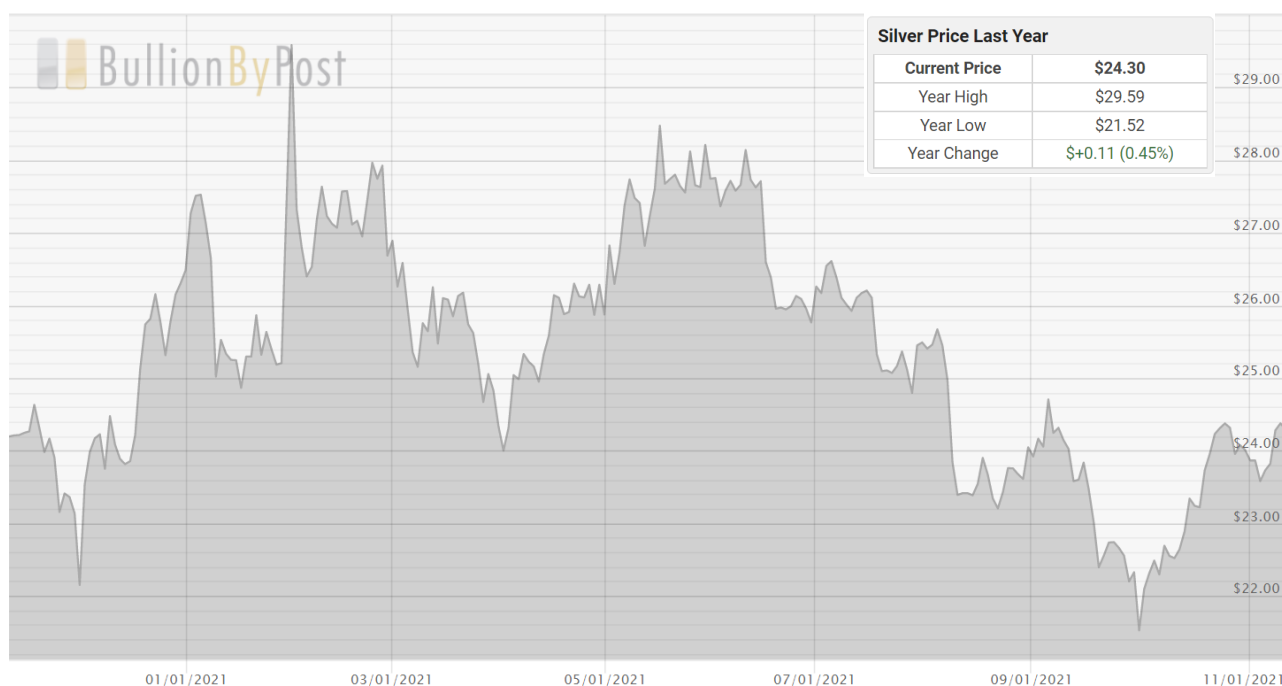

On August 20, 2021, the Company announced that its board of directors had unanimously approved a spin-out of 80% of the Company’s Canadian exploration assets (the “**Canadian Assets**”), to its shareholders by way of a share capital reorganization effected through a statutory plan of arrangement (the “**Arrangement**”). Subsequent to September 30, 2021, the Arrangement became effective, and the Canadian Assets held through Kootenay’s then wholly-owned subsidiary, Kootenay Resources Inc. (“**Spinco**”) became a reporting issuer. Under the Arrangement, Kootenay distributed 80% of the common shares (each, a “**Spinco Share**”) of Spinco to Kootenay’s shareholders. The Arrangement was made effective on October 29, 2021, shareholders own shares Kootenay and Spinco. Spinco is currently reviewing options to have its shares listed on a public stock exchange. Spinco, will focus on the development of the Canadian Assets, and Kootenay, will continue with the exploration and development of its Mexican assets.

On November 4, 2021, Mr. Eric Sprott through, 2176423 Ontario Ltd. announced he acquired common shares of Kootenay Resources Inc. pursuant to the closing of the Arrangement having received 1,206,000 shares and will be entitled to acquire and additional 675,000 shares through the potential exercise of warrants of Spinco representing approximately 7.5 percent of the outstanding shares on a non-diluted basis and approximately 11.3 per cent of the outstanding shares on a partially diluted basis assuming exercise of Spinco warrants

## SILVER MARKET

Over the past year interest in global silver investment has risen significantly resulting in all-time highs for silver in exchange-traded products (ETPs), global mint bullion coin sales and strong net-long positioning on COMEX. The silver price, which ended the 2020 year at \$26.30 per ounce, and hit a 12-month high of \$29.59 on February 1, 2021. The silver spot price at the date of this MD&A is \$24.30 per ounce which is up from the 12-month low of \$21.52 hit on September 30, 2021.

Chart: One-year Silver price

The strong performance in the silver price has been a welcome contrast for silver investors in comparison to previous years. For most commodities, supply and demand fundamentals dominate price behaviour, however this does not always apply to silver and gold because of their monetary qualities and reactions to macroeconomic factors. Although the price of silver can be strongly linked to gold, silver differs from gold in the fact that it is also considered to be an industrial metal and can also be linked to the performance of base metals production and industrial demand. That said a gold: silver divergence can emerge when the macroeconomic environment deteriorates, however because of its lower liquidity, silver can outperform gold in the event of a financial crisis. The gold to silver ratio as of the date of this MD&A is approximately 1:75 ounces, with the 1-year high of 1:80 and a low of 1:63 ounces.

Chart: One-year Gold to Silver Ratio

## SUBSEQUENT EVENTS

There continues to be a global outbreak of COVID-19, which has had a significant impact on businesses through the restrictions put in place by the Canadian, provincial and municipal governments regarding travel, business operations and isolation/quarantine orders. At this time, it is unknown the extent of the impact the COVID-19 outbreak may have on the Company as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease, variants of the disease, and the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place by Canada and other countries to fight the virus.

On October 6, 2021, the Company announced results for 6 additional drill holes from the Columba Project. Drill holes CDH-21-102 to CDH-21-107, tested across the J-Z trap zone approximately 700 meters east of the F vein.

CDH-21-103 is the third hole that appears to be defining a very high-grade mineralized body intersected now in a total of 3 holes and thus far defines a zone of a 40 by 60 meter east west orientation with at least 80 meters of dip extent. The body appears to be pipe like in shape and plunge moderately to the northeast and is open up and down dip.

This particularly high-grade zone of hydrothermal breccias and stockwork in CDH-21-103 has now been hit in three holes being the current CDH-21-103 and previously reported CDH-19-030; 20-060, highlights below:

### Hole CDH-19-030

- 982 gpt silver over 1.9 meters within 721 gpt silver over 4.07 meters and 200 gpt silver over 25.85 meters and

#### Hole CDH-20-060

- 608 gpt silver over 5 meters within 361 gpt silver over 11 meters and 229 gpt silver over 22 meters

#### Hole CDH-21-103

- 2,035 gpt silver over 6 meters within 805 gpt silver over 17 meters and 333 gpt silver over 44 meters.
- A project high assay of 9,840 gpt silver over 0.92 meters.
- CDH-21-103 returned the high of 14,652 gram-meters (333 gpt silver times 44 meters). Gram-meters are defined as grams per tonne multiplied by meters drilled.

On November 3, 2021, the Company announced multiple high-grade drill results from three additional holes which intercepted the D Vein located on the Columba Project.

The D Vein is approximately 600 meters southwest from the F Vein where most of the historic production has taken place on the property. CDH-21-110 intercepted high-grade silver intercept grading 13,545 gram-meters in the D Vein (459 gpt silver times 29.9 meters). This is the second highest intercept to date.

*Drill Highlights from holes CDH-21-108 to CDH-21-110 are as follows:*

#### Hole CDH-21-110:

- 453 gpt silver over 29.9 meters; including
- 650 gpt silver over 17.8 meters; including
- 932 gpt silver over 6 meters
- Intercept includes a high of 1,915 gpt silver over 0.85 meters

#### Hole CDH-21-109:

- 193 gpt silver over 14.56 meters; including
- 294 gpt silver over 7.11 meters; including
- 476 gpt silver over 2.31 meters
- Intercept includes a high of 592 gpt silver over 0.75 meters

#### Hole CDH-21-108:

- 98 gpt silver over 77 meters; including
- 328 gpt silver over 11 meters; including
- 504 gpt silver over 5.9 meters
- Intercept includes a high of 1,100 gpt silver over 1.0 meter
- All hosted in wide mineralized zone averaging 57 gpt silver over 166 meters

These three holes were completed to follow-up on previous drill results which demonstrated high-grade silver potential within the D Vein. Earlier holes drilled along the D Vein included hole CDH-20-079 returning 525 gpt silver over 1.58 meters within 5.35 meters of 290 gpt silver and hole CDH-19-022 returning 373 gpt silver over 1.5 meters within 6.25 meters of 244 gpt silver. Drill hole CDH-21-110 is not only the second richest intercept at Columba to date on a gram per meters basis it is also the deepest drill test on the D Vein to date hitting the vein at about a 1650-meter elevation. Higher silver grades have been typically intercepted at and below this elevation across many of the veins at Columba and these recent results continue to confirm the Company's general exploration model.

See also the Overview of Performance – 2021 section of this MD&A.

## **PORTFOLIO OF EXPLORATION AND EVALUATION ASSETS**

The Company has pursued the advancement of its Promontorio and La Cigarra Projects as well as establishing Generative Exploration Teams in Northwest Mexico and British Columbia, Canada. The Company continues to seek joint venture partners to option its generative exploration projects to conduct exploration and make option payments to the Company to obtain a right to an earn-in interest in the project. The Company currently has two mineral properties under option namely, La Mina; Two Times Fred and a joint venture agreement on the Cervantes property with Aztec Minerals Corp., the La Mina and Cervantes properties are located in Sonora State, Mexico and the Two Times Fred property is located in British Columbia, Canada.

## THE COLUMBA PROJECT

On November 19, 2018, the Company announced that it had entered into an option agreement to acquire a 100% interest in the Columba silver project, which hosts a past producing, high-grade silver mine which operated circa 1910. Work reportedly ceased in the region during the Mexican Revolution. A second period of mining occurred in the late 1950's to early 1960's. Columba is approximately 1,000 hectares in size and covers a high-grade silver epithermal system comprised of numerous veins, which the Company has mapped over strike lengths from 200 meters to 2 kilometers.

Under the terms of the Agreement, the Company can acquire a 100% ownership in the concessions by making staged payments over a 4-year period totaling US\$3,290,000. Payments are weighted to the back end of the agreement with an initial payment of US\$15,000 and first and second years payments totalling US\$75,000 (paid). A total of US\$440,000 has been paid which includes US\$200,000 paid during the nine months ended September 30, 2021. The Agreement included a work commitment of US\$250,000 by the first anniversary and an additional US\$750,000 by the second anniversary of the Agreement, which have both been completed by the Company. Upon earn-in the vendors retain a 2% n.s.r. of which 1% can be bought by the Company for US\$750,000 (see November 5, 2018 news release for full details).

The Company has since acquisition performed sampling, mapping and drilling at Columba including 41 holes with 6,853 meters of drilling. Results to date are in line with historic data bolstering the confidence in the potential for the discovery of high-grade silver deposits on the property. As announced on October 14, 2021 and subsequent to September 30, 2021, the Company significantly increased its land holdings contiguous to the original Columba project. The Company's new area of interest will now expand from just under 1,000 hectares to more than 10,000 hectares with the application of a new concession surrounding the Columba project.

The Company completed in 2020, 43 drill holes totalling 9,114 meters, targeting six different veins on the Columba project in the Phase II drill program.

Highlights of the Company's drill programs in 2019 and 2020 can be found here: [Project Highlights Columba](#). A complete table of drill results can be found here: [Columba Drilling](#).

See Overview of Performance – 2021 section of this MD&A.

## THE COPALITO PROJECT

During 2018, the Company's wholly owned Mexican subsidiary entered into an option agreement (the "Agreement") to acquire a 100% interest in the Copalito Silver-Gold Project located in the State of Sinaloa, Mexico.

Copalito covers a gold and silver epithermal vein system comprised of numerous veins, with individual veins currently traced over strike lengths up to 2 kilometers. Veins vary in width from 0.5 to 15 meters at surface and grade from background to highs of 8.2 gpt gold and 3,770 gpt silver in grab samples. Highlights of surface chip samples graded 573 gpt silver and 2.1 gpt gold over widths of 1 meter and 1,066 gpt silver over 3.8 meters. Copalito is located about 35 km east of McEwen Mining's "El Gallo mine" complex. The project lies within a broad northeast trending transform geological belt approximately 350 kilometers in length that includes the districts and projects of Parral, Santa Barbara, Guanacevi, and La Pitarilla. *Surface and channel samples disclosed are "best samples" and these samples may not be representative of the entire samples.* There is no indication of the property having been previously drill tested.

On October 3, 2019, the Company announced the signing of an access agreement on the Copalito project, allowing access to conduct exploration activities including but not limited to mapping, sampling, geophysics, trenching and drilling.

Copalito consists of seven concessions totaling approximately 3,700 hectares. Under the terms of the Agreement, the Company can acquire a 100% ownership in the concessions by making staged payments over a 4-year period totaling US\$985,000, of which US\$460,000 has been paid, with US\$200,000 being paid during the nine months ended September 30, 2021. The Company at its option may accelerate the payments due under the Agreement. Upon earn-in the vendors will retain a 0.5% net smelter return. Subject to TSXV approval, the Company shall pay an arms length party a finder's fee of 100,000 common shares and a cash payment of C\$10,000.

Results show potential for a mineralized "shoot" in the southern part of the 5 Señores vein. The zone remains open in several directions. A clearer picture on the shape and size of these zones will begin to emerge on receipt of further results and assist in the planning of follow up drilling. Drill holes reported to date have tested 600 meters of strike and 175 meters of dip extent to depth in 12 holes with vein mineralization open along strike and to depth. Only 2 holes have drill

tested a depth greater than 100 meters vertically from surface although topographic relief has enabled testing to 175 meter down dip.

Highlights of the Company’s drill program for 2020 and 2021 can be found here: [Project Highlights Copalito](#)

See Overview of Performance – 2021 section of this MD&A.

## LA CIGARRA PROJECT - EXPLORATION

Since acquiring the La Cigarra silver project in April 2016 from Northair Silver Corp, the Company completed several exploration programs including drilling, relogging of core and mapping of large areas of the project.

The mineralized structure is open along strike to the northwest and down dip and appears continuous with the resource for an additional 1000 meters of strike to the northwest. It varies in width from about 15 to 45 meters and has been tested by broad spaced drilling from surface down dip from between 50 meters and 150 meters. Additional results were released on July 12, 2018, which included drilling conducted on Las Carolinas, La Borracha and Nogalera zones with results returning a series of silver intercepts. Highlights included: Hole CC-18-51 with 109.27 gpt silver over 12.0 meters within a wider intercept of 45.22 gpt silver over 41.38 meters; extending the mineralized silver zone to the south for 100 meters as well as down dip for 200 meters. Drilling in Nogalera Gold trend returned only anomalous amounts of gold in narrow structures. The program was curtailed due to market conditions related to the silver price and general junior exploration market. A new geological model is underway to optimize resource grade dependant on results this could lead to an updated resource and a decision to undergo a PEA on the project.

## LA CIGARRA PROJECT – RESOURCE ESTIMATE

In January 2015, Northair announced the results of an updated NI 43-101 Resource Estimate (“Resource Estimate”) completed by Allan Armitage, PhD, P. Geo. and Joe Campbell, B.Sc., P. Geo., of GeoVector Management Inc. and was filed on SEDAR on March 2, 2015. The Resource Estimate was calculated based on results from 156 of 171 holes totaling 30,443 meters within the potentially surface minable mineralized area comprised of the San Gregorio and Las Carolinas mineralized zones, which combine to form a total strike length of 2.4 kilometers. The resource estimate was constrained by a Whittle™ pit shell utilizing a USD \$22/oz silver price, an economic cutoff grade of 35 gpt of silver and metallurgical recoveries of 84% silver is tabulated below:

Resource Category*	Tonnes	In-Situ Grade				Contained Metal			
		Ag (gpt)	Au (gpt)	Pb (%)	Zn (%)	Ag (oz)	Au (oz)	Pb (lbs)	Zn (lbs)
Measured	3,620,000	88.9	0.074	0.14	0.19	10,340,000	9,000	10,920,000	15,510,000
Indicated	14,930,000	85.7	0.068	0.13	0.18	41,130,000	33,000	42,950,000	59,260,000
<b>Meas. + Ind</b>	<b>18,540,000</b>	<b>86.3</b>	<b>0.069</b>	<b>0.13</b>	<b>0.18</b>	<b>51,470,000</b>	<b>41,000</b>	<b>53,870,000</b>	<b>74,770,000</b>
<b>Inferred</b>	<b>4,450,000</b>	<b>80.0</b>	<b>0.058</b>	<b>0.13</b>	<b>0.16</b>	<b>11,460,000</b>	<b>8,000</b>	<b>12,680,000</b>	<b>15,610,000</b>

\*Note: Mineral resources are reported in relation to a conceptual pit shell at a 35 gpt silver cut-off grade and a USD \$22/oz silver price. Mineral resources that are not mineral reserves do not have demonstrated economic viability. All figures are rounded to reflect the relative accuracy of the estimate and numbers may not add up due to rounding.

## PROMONTORIO SILVER PROJECT

### The La Negra Discovery

The La Negra discovery is a hydrothermal-diatreme breccia exposed over a 100 to 150 x 500-meter area and is contained within the Promontorio claim block, approximately 7.0 km north of the Promontorio resource. The Company drilled a total of 6,213 meters over 41 core drill holes and Pan American drilled 56 holes totaling about 11,000 meters into the La Negra Breccia. Preparation is being made for the first resource estimate on La Negra which is anticipated in 2021.

A complete table of drill results can be found here: [La Negra Drilling](#).

As announced on July 15, 2021, the Company engaged Blue Coast Research Ltd. for metallurgical testing to assess the best recovery process for La Negra mineralization and the Company as commenced work on a resource estimate.

## PROMONTORIO SILVER PROJECT – RESOURCE ESTIMATE

On May 14, 2013, the Company announced the results of an resource estimate prepared by SRK incorporating the gold (“Au”) content contained into the mineral resources of the Promontorio Silver Project, due to new metallurgical data and information which supports the potential recovery of gold (see February 28, 2013 news release). The updated Measured and Indicated Resource contains an estimated 44,504,000 tonnes containing an estimated 92,035,000 oz. silver equivalent (“AgEq”) grading 64.32 gpt AgEq with another 24,326,000 oz. AgEq grading 51.95 gpt AgEq categorized as Inferred, as summarized the table below:

**Resource Statement for the Promontorio Deposit, Sonora State, Mexico: Effective Date March 31, 2013\***

Pit-Constrained	20 gpt AgEq Cut-Off	Tonnes (000's)	Avg AgEq (gpt)	Avg Ag (gpt)	Avg Au (gpt)	Avg Pb (%)	Avg Zn (%)	AgEq Oz (000's)	Ag Oz (000's)	Au Oz (000's)	Pb lbs (000's)	Zn lbs (000's)
	Measured		10,289	74.79	32.69	0.40	0.46	0.55	24,741	10,814	134	105,328
Indicated		34,215	61.18	26.30	0.34	0.38	0.45	67,294	28,926	373	287,579	335,904
<b>M+I</b>		<b>44,504</b>	<b>64.32</b>	<b>27.77</b>	<b>0.35</b>	<b>0.40</b>	<b>0.47</b>	<b>92,035</b>	<b>39,740</b>	<b>506</b>	<b>392,907</b>	<b>459,619</b>

<b>M+I</b>		<b>215</b>	<b>56.96</b>	<b>22.89</b>	<b>0.28</b>	<b>0.40</b>	<b>0.55</b>	<b>393</b>	<b>158</b>	<b>2</b>	<b>1,913</b>	<b>2,591</b>
Inferred		1,265	61.17	26.57	0.37	0.36	0.38	2,488	1,081	15	10,049	10,667

Notes: \* **Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the Mineral Resources estimated will be converted into Mineral Reserves.**

<sup>1</sup> Open pit resources stated as contained within a potentially economically minable pit shell;

<sup>2</sup> Pit optimization is based on assumed silver (“Ag”), gold, lead (“Pb”), and zinc (“Zn”) prices of \$31/oz., \$1650/oz., \$0.96/lb., and \$0.89/lb. respectively, mill recoveries of 74%, 70%, 81% and 88% respectively, a 1.5% NSR, estimated mining costs of \$1.20/t, and estimated processing and G&A cost of \$12.00/t; and an estimated POX cost of \$2/tonne (\$30/tonne of pyrite concentrate);

<sup>3</sup> Break-even cut-off grades used were 20 gpt AgEq for open pit mill material and 45 gpt AgEq for underground material;

<sup>4</sup> Silver equivalency is based on unit values calculated from the above metal prices, and assumes 100% recovery of all metals; and

<sup>5</sup> Mineral resource tonnage and contained metal have been rounded to reflect the accuracy of the estimate, and numbers may not add due to rounding.

The following material changes incorporated into the updated resource estimate contributed to the significant increase in the mineral resource:

- Additional metallurgical test work has allowed for the inclusion of gold in the mineral resources, which has a significant impact on the AgEq grades and relative ounces.
- The estimated Measured and Indicated gold resources contained within the mineralized diatreme system total 508,000 ounces with an additional 155,000 ounces Inferred.

This mineral resource estimate was completed by Matthew Hastings MSc, P. Geo and reviewed by Frank Daviess, MAusIMM, RM-SME, Associate Principal Resource Geologist with SRK. A site visit was conducted by Allan Moran, of SRK, R.G., C.P.G, who has reviewed pertinent geological information in sufficient detail to support the data incorporated in the mineral resource estimate. Mr. Davies is an Independent Qualified Person as defined under NI 43-101 and is responsible for the mineral resource estimate presented in this release. Eric Olin, of SRK, MSc, MBA, RM-SME reviewed the metallurgical information contained in this release.

G&T Metallurgical Services Ltd, Kamloops, BC, Canada completed preliminary metallurgical programs on drill core composites from the Promontorio property for Kootenay in 2009, 2012 and 2013. Several significant factors were noticed in SRK’s review of the metallurgical process work conducted to date. The metallurgical program investigated a standard polymetallic sequential flotation flow sheet that includes:

- Crushing;
- Grinding;
- Lead Flotation;
- Zinc Flotation; and
- Pyrite/Arsenopyrite Flotation

Pressure oxidation (POX) of the pyrite/arsenopyrite concentrate is required to extract the contained gold by cyanidation. SRK estimates metal recoveries shown in the table below are based on the average results from the preliminary metallurgical test programs conducted in 2009, 2012 and 2013. Overall gold recovery is estimated at 70% and is based on 65% gold recovery into the pyrite flotation concentrate followed by 94% cyanidation gold extraction from the pyrite concentrate after pressure oxidation, plus an average 9% gold recovery into the lead flotation concentrate.

#### Metallurgical Recovery Assumptions

Metal	Product	Recovery (%)
Silver	Lead Concentrate	74
Lead	Lead Concentrate	81
Zinc	Zinc Concentrate	88
Gold	Pyrite Concentrate	65
Gold	Lead Concentrate	9
Gold	Overall *	70

\* Includes 94% cyanidation extraction from pyrite concentrate + gold contained in lead concentrate

The NI 43-101 compliant Technical Report was filed on June 7, 2013 and can be reviewed on SEDAR ([www.sedar.com](http://www.sedar.com)).

### GENERATIVE EXPLORATION PROJECTS

The Company continues to seek partners to option its projects under its generative model, which minimizes financial and exploration risk by granting external exploration companies a right to earn an interest in properties, subject to exploration expenditures and share payments made by them. Generative properties are continuously prioritized for further work or dropped based on ongoing exploration work. The Company continues to market generative properties including properties that have been returned after termination of option agreements. Additionally, Canadian assets have been spun-out to Kootenay Resources Inc. see Overview of Performance – 2021 section of this MD&A.

#### Mexico

##### Cervantes Project

On July 25, 2015, the Company entered into an option agreement with Aztec Metals Corp. (“Aztec”), whereby the Company granted Aztec the right to earn up to a 100% interest in the Cervantes Gold/Copper project located in Sonora, Mexico. Effective September 30, 2016, the obligations of the option agreement were assigned to Aztec Minerals Corp. from Aztec. The terms of the agreement allow Aztec to earn a 65% interest by: spending an aggregate total of US\$1.5 million in exploration expenditures by July 25, 2019; paying an aggregate total of US\$150,000 in staged payments to the Company by July 25, 2019; and issuing an aggregated total of 1,000,000 common shares in staged payments on each anniversary to the Company, with final issuance payable 60 days after the fourth anniversary. Aztec will also be responsible for annual Mexican assessment work and mining concession taxes during the term of the agreement.

Aztec have fulfilled their obligations under the earn-in option agreement and the parties entered into a joint venture agreement on December 16, 2020. The Company holds 35,000 Common Shares of Aztec Minerals JV Corp. with Aztec holding 65,000 Common Shares, representing the remaining 65% of the issued and outstanding Common Shares.

An approved two-phase exploration program totalling \$1.13 million CDN exploration program is planned in 2021. The first phase \$85,000 program of sampling and mapping is complete. The second phase 5,000 meter over 22 drill hole reverse circulation drill program will commence in November 2021 which will focus on four main targets 1) California; 2) California North prospect; 3) Jasper prospect; and 4) Purisima East target.

##### La Mina Project

On June 28, 2018, the Company announced that its wholly owned Mexican subsidiary had entered into an option agreement (“Agreement”) with Capstone Mining Corp. (TSX: CS) (“Capstone Mining”) on the Company’s La Mina Project (“La Mina”), located 180 kilometers southeast of the city of Hermosillo in Sonora State, Mexico. La Mina was staked by Kootenay as part of its generative property portfolio strategy and covers the upper levels of a zoned copper porphyry mineral system exposed over a 2 by 2-kilometer area.

The Agreement allows Capstone Mining to earn an initial 60% (“Initial Earn In”) interest in La Mina by making staged cash payments totalling US\$600,000 and incurring exploration expenditures totalling US\$4 million over 4 years. Following the Initial Earn In, Capstone may earn up to a 100% interest in La Mina in stages by completing certain milestones including preparation of a preliminary economic assessment, a prefeasibility study and paying an additional

aggregate total of US\$8.4 million to Kootenay in stages at each of the various milestones. During the nine months ended September 30, 2021, the Company received from Capstone US\$100,000 for the second cash payment.

The La Mina is subject to an underlying information agreement (dated May 4, 2018) between the Company and a third party whereby, the third party holds a net smelter return royalty (“Underlying Royalty”) of 2.5% on the concession. The Company has renegotiated the right to purchase on or before the beginning of commercial production up to 2% of the Underlying Royalty (“Buydown”) in increments of 0.25% for aggregate total of US\$1.6 million. The Company will pay US\$20,000 and issued 142,000 common shares of the Company to the third party. If Capstone Mining earns the 100% interest, Kootenay will retain a 1% net smelter return with no buy out option of which 0.5% will be held by the third party after giving effect to the Buydown.

## **Canada**

### **Two Times Fred Project**

On July 1, 2014, pursuant to a grubstake agreement, the Company optioned the Two Times Fred property located in the Nechako Plateau of Central British Columbia. To maintain its option, the Company must make total cash payments of \$80,000; issue an aggregate total of 230,000 common shares and make a cash payment of \$5 per metre drilled to a maximum of 100,000 metres. Under the Kennedy grubstake agreement, a 2% NSR exists and can be purchased by the Company for \$500,000 per each one-half (0.5%) percentile. The Company has made total cash payments of \$80,000 and issued 230,000 shares with a fair value of \$58,425.

On March 30, 2021, the Company announced the signing of an option agreement with a wholly owned subsidiary of Centerra Gold Inc. (“Centerra”), whereby Centerra is granted an option to earn a 70% interest in the Two Times Fred property.

A total of C\$6 million in exploration expenditures and C\$500,000 in cash payments (\$50,000 received) must be incurred and made over a four-year period for Centerra to earn a 70% interest. The first year requires a work expenditure of \$1 million with a minimum commitment of \$650,000. Upon earn in, the two companies will enter a standard joint venture agreement with the Company retaining a 30% interest, and funding of further work will be done on a pro rata basis amongst the joint venture partners.

See Overview of Performance – 2021.

### **Mark Project**

On June 7, 2017, the Company exercised its right under a Grub Stake Agreement (the “Grub Stake Agreement”) with the Kennedy Group to acquire a 100% interest in the Mark Project (the “Acquisition”). The Mark Project is comprised of 17 mineral tenures totaling approximately 14,093 hectares. Pursuant to the terms of the Grub Stake Agreement, in order to complete the Acquisition, the Company issued 100,000 common shares to the Kennedy Group upon receipt of TSX Venture Exchange (“TSXV”) approval. Following completion of the Acquisition, the Kennedy Group will retain an underlying 1% net smelter returns royalty, which can be purchased by the Company, in whole or in part, for \$1,000,000 per each one-half percent (0.5%).

### **Meachen Bend Project**

On October 29, 2018, the Company announced it had entered an option agreement to acquire a 100% interest in the Meachen Bend Project (the “Meachen Property”) located 30 kilometers southwest of the famous Sullivan silver-lead-zinc mine which hosted 350 million ounces of silver, within 160 million tonnes grading 12% lead plus zinc and 68 gpt silver. The Meachen Property is comprised of three mineral tenures totaling approximately 1,048 hectares and covers elevated base metals, alteration and stratigraphy consistent with those areas peripheral to a silver-lead-zinc Sullivan style deposit. In addition, a strong single line MT conductor sits at relatively shallow depths, which the Company believes could be caused by massive sulfides distinctive to a Sullivan type deposit.

Pursuant to the terms of the option agreement, the Company must issue 500,000 common shares and staged cash payments totaling \$100,000 over 4 years, the Company issued 150,000 common shares with a fair value of \$26,750, with 50,000 common shares with a fair value of \$17,250 and paid \$35,000 in cash payments during the year ended December 31, 2020. During the nine months ended September 30, 2021, the Company paid \$30,000 in cash payments and subsequent to September 30, 2021, the Company issued 150,000 common shares related to the third anniversary payments. Following completion of the Acquisition, the Kennedy Group will retain an underlying 1.5% net smelter returns royalty, of which, one-half percent (0.5%) can be purchased by the Company, for \$500,000.

### **Moyie Anticline Program**

During 2020, the Company initiated a program aimed specifically at the discovery of large silver-base metal deposits. One such program is focused in the famous Purcell Basin in southeastern B.C. that is host to billions of ounces of silver in the Coeur D'Alene, Montana Copper-Silver and Sullivan mining districts. The Company staked approximately 35,000 additional hectares during 2020 in the southeast of British Columbia. The Moyie Anticline is comprised of six collective properties totaling approximately 32,232 hectares. In addition to the tenures that make up the Moyie Anticline property the Sweet Spot, Lady Slipper, Kenco, Down Dip and Leaky Pipe round out the properties included in the program. During 2021, the Company is planning detailed geologic mapping and prospecting combined with deep seeing geophysics this may lead to a drilling plan.

Pursuant to the terms of the option agreement, the Company must issue 100,000 common shares for each of the six properties for an aggregate total of 600,000 common shares by June 16, 2023. Following completion of the Acquisition, the Kennedy Group will retain an underlying 2% net smelter returns royalty, of which, one and one-half percent (1.5%) can be purchased by the Company, for \$3,000,000.

### **EARN-IN OPTION AGREEMENT**

The Company had two properties as at the date of this MD&A that are subject to earn-in option agreements, summarized below:

<b>Property</b>	<b>Company</b>	<b>Interest of partner</b>
Two Times Fred	Centerra Gold (KB) Inc.	70% earn-in option
La Mina, Sonora, Mexico	Capstone Mining	up to 100% earn-in option

### **FINANCING ACTIVITIES**

On August 25, 2020, the Company closed its brokered private placement and issued 17,500,000 Units at a price of \$0.40 per unit for aggregate gross proceeds of approximately \$7,000,000. The Offering was led by Mackie Research Capital Corporation, as lead agent and sole bookrunner, on behalf of a syndicate which also included PI Financial Corp. (together, the "**Agents**"). Eric Sprott, through 21764123 Ontario Ltd., participated in the Offering to maintain his proportionate equity interest in the Company by acquiring 2,500,000 Units.

Each Unit is comprised of one common share of the Company and one-half of one common share purchase warrant. Each Warrant is exercisable to acquire one Common Share at a price of \$0.55 per share until August 25, 2022. The securities issued under the Offering are subject to the four month hold period prescribed under Canadian securities laws expiring on December 26, 2020, the Agents received an aggregate cash fee equal to 6.0% of the gross proceeds from the Offering (other than in respect of certain subscribers on which a cash fee equal to 3.0% was paid). In addition, the Company issued to the Agents 1,050,000 non-transferable broker warrants (the "**Broker Warrants**"). Each Broker Warrant entitles the holder to purchase one Unit at an exercise price equal to the Offering Price until August 25, 2022.

During the year ended December 31, 2020, the Company received \$3,634,995 from the exercise of 13,409,150 share purchase warrants with the exercise price ranging from \$0.20 to \$0.55. Additionally, \$164,250 was received from the exercise of 1,062,500 share purchase options.

During the nine months ended September 30, 2021, the Company received \$370,061 from the exercise of 1,850,111 share purchase warrants. Additionally, \$23,800 was received from the exercise of 170,000 share purchase options.

## INVESTING ACTIVITIES

As at September 30, 2021, capitalized mineral property expenditure totaled \$85,073,348 (2020 - \$78,785,303) during the nine months ended September 30, 2021, the Company expended \$5,015,492 (2020 - \$3,628,791) as disclosed in the table below.

	MEXICO						Mexico Total \$	CANADA			Canada Total \$	2021 Total \$	2020 Total \$

## RESULTS OF OPERATIONS

### Three months ended September 30, 2021

The Company recorded a net loss of \$820,184 or \$0.003 per share (2020 – \$576,890 or \$0.002) for the three-month period ended September 30, 2021, based on a greater weighted average number of shares outstanding.

Corporate general and administrative expenditure for the three-month period ended September 30, 2021 totaled \$723,821 (2020 – \$451,180), which included non-cash option-based payment expense of \$11,498 (2020 – \$16,790). Office and general costs increased to \$331,934 (2020 – \$153,031) which includes the Company's offices and staff in Vancouver and exploration offices in Hermosillo, Mexico and Kimberley, British Columbia. Also included in office and general is the Company's promotional, travel and investor relations expenses, which increased versus the prior comparable period and totaled \$132,156 (2020 – \$47,528) due to increased promotional activities including advertising, marketing and conferences costs during the period. Management fees increased to \$60,000 (2020 – \$48,250). Professional fees increased versus the prior comparable period due to additional legal and consulting work partially related to the Canadian spinout during the period and totaled \$217,606 (2020 – \$166,288), which includes director's fees of \$30,000 (2020 – \$23,000).

For the three-month period ended September 30, 2021, the Company recorded a foreign exchange loss of \$41,500 (2020 – loss \$113,641). The Company maintains foreign currency in both Mexican peso and US dollar accounts and incurs certain operating expenditures in each of those currencies, which coupled with consolidating its Mexican subsidiary gives rise to exchange risk. Property investigation of mineral properties costs totaling \$63,080 (2020 – \$24,932) were expensed in the period. Finance income decreased versus the prior comparable period and totaled \$8,217 (2020 – \$12,863).

### Nine months ended September 30, 2021

The Company recorded a net loss of \$1,801,563 or \$0.006 per share (2020 – \$1,422,408 or \$0.004) for the nine-month period ended September 30, 2021, based on a greater weighted average number of shares outstanding.

Corporate general and administrative expenditure for the nine-month period ended September 30, 2021 totaled \$1,631,687 (2020 – \$1,259,427), which included non-cash option-based payment expense of \$11,498 (2020 – \$98,734). Office and general costs increased to \$749,001 (2020 – \$584,146) which includes the Company's offices and staff in Vancouver and exploration offices in Hermosillo, Mexico and Kimberley, British Columbia. Also included in office and general is the Company's promotional, travel and investor relations expenses, which decreased versus the prior comparable period and totaled \$263,251 (2020 – \$264,589) due to COVID restrictions a decrease in promotional activities including advertising, marketing and conferences costs during the period. Management fees increased to \$210,000 (2020 – \$144,750). Professional fees increased versus the prior comparable period due to additional legal and consulting work partially related

to the Canadian spinout during the period and totaled \$443,993 (2020 – \$297,910), which includes director’s fees of \$84,000 (2020 – \$72,000).

For the nine-month period ended September 30, 2021, the Company recorded a foreign exchange loss of \$46,340 (2020–loss \$152,132). The Company maintains foreign currency in both Mexican peso and US dollar accounts and incurs certain operating expenditures in each of those currencies, which coupled with consolidating its Mexican subsidiary gives rise to exchange risk. Property investigation of mineral properties costs totaling \$161,504 (2020 – \$81,955) were expensed in the period. Finance income decreased versus the prior comparable period and totaled \$37,968 (2020 – \$71,106).

## **LIQUIDITY AND CAPITAL RESOURCES**

As of September 30, 2021, the Company had working capital of \$6,494,112 (2020 - \$12,488,454), with cash and cash equivalents totaling \$4,094,029 (2020 - \$10,380,346).

See Financing Activities section of the MD&A for financing details related to 2021 and 2020.

The Company plans to continue its exploration efforts in 2021 in Mexico and Canada with the use of its current cash position, see Outlook section of the MD&A. It also plans to generate opportunities to acquire new properties and to enter into options or joint ventures with third parties to manage risk. The Company also plans to finance its future activities primarily through raising capital from private placements of equity capital in the Company and through payments it receives from option and joint ventures of the Company’s properties to qualified mineral exploration companies. There can be no assurance that the Company will succeed in obtaining financing, now or in the future or that it will be successful in obtaining payments through optioning and joint venturing some or all its properties. Failure to raise sufficient funding for its operations and ongoing business activities on a timely basis could cause the Company to suspend its operation and eventually to forfeit or sell its interest in its mineral properties.

The Company’s ability to raise additional capital or to receive option payments from third parties is subject to a number of factors, uncertainties and risks including market conditions that could make it difficult or impossible for the Company to raise necessary funds to meet our capital and operating requirements. If we are unable to obtain financing through equity investments, we plan to consider other financing solutions including, but not limited to, joint ventures, credit facilities or debenture issuances. We are also attuned to the effect of capital markets on many of our joint venture partners who may not be able to meet their obligations under their option or joint venture agreements.

All cash is held with Schedule A banks either in deposit accounts or guaranteed investment certificates, and the Company has no joint ventures with any parties that potentially create derivative or hedge risk.

## **OUTLOOK**

Due to the Coronavirus pandemic the Company continues to monitor current events and restrictions as outlined by both the Canadian and Mexican government and adhering to strict safety procedures.

The Columba 2021 drill program, planned for 5,000 meters of drilling with a budget of \$1,700,000 and commenced in early March 2021. The program was completed and a total of 5,782 meters were completed. Drilling focussed on step out and infill drilling in the high-grade F-vein and its associated hanging wall vein, a new discovery blind to surface. Focus then shifted to expanding on numerous other high-grade results previously encountered which included the J and Z vein, JZ Trap zone, the East Block zone, the D and B Vein.

The Copalito 2021 drill program commenced late March 2021 and was a follow up to the maiden drill program. The Company planned for 3,500 meters of drilling with a budget of \$1,200,000. The program was completed and a total of 3,859 meters were drilled. Drill planning was guided by detailed structural mapping to test veins such as 5 Senores located in the southern area where good continuity and grade potential has been shown for at least 600 meters of strike length.

The La Cigarra project contains a resource with significant expansion potential located in one of the most prolific silver mining districts of Mexico, the Parral Mining District. With the strengthening of silver prices, the Company is continuing work on geologic modeling to determine if geologic controls to silver mineralization exist and does this improve the grade. If the result is positive this could lead to an update of the resource estimate and a PEA decision. Confirmation drilling would be required to prove the accuracy of the geologic model prior to a resource update. Prior to remodeling four areas were identified to test for resource expansion:

- La Borracha high-grade (the mineralized trend located 1,000 meters northwest from the northern boundary of the resource);
- La Borracha Connection (connecting La Borracha with the San Gregorio area of the resource);
- Gap (an under drilled area between the main San Gregorio and Las Carolinas zones that currently comprise the resource); and
- the Carolinas Extension (the strike extension of the resource to the southeast).

The Company plans to prepare a maiden resource estimate on La Negra during late 2021, with initial work underway including metallurgical recoveries.

### **The Cervantes JV**

A two-phase exploration has been approved by the JV committee. The plan calls for a two-phase, \$1.13 million CDN exploration program in 2021. The first phase calls for an \$85,000 program of sampling and mapping. The second phase is a \$1.05 million dollar drilling program which will commence in November 2021. Exploration partner Aztec Minerals will be the operator of the JV.

### **Generative Projects**

The Company hopes to continue to fund modest grass roots exploration that generates new mineral discoveries with the objective of seeking partners to finance the advancement of these projects. Work programs will also be initiated on other properties located in Mexico and Canada by the Company's option partners.

During 2021, the Company's option partners are continuing their exploration program summarized below:

#### **La Mina Project, Sonora State, Mexico**

*(100% Kootenay owned and optioned to Capstone Mining Corp.)*

The Company has been informed that Capstone is reviewing exploration of its Amapa target which contains the La Mina project.

#### **Two Times Fred, Nechako Plateau, British Columbia, Canada**

*(100% Kootenay owned and optioned to Centerra Gold (KB).)*

The 2021 Phase 2 drilling program began late in the reporting period. The program is expected to comprise 2,000 to 3,000 meters of drilling in up to 11 drill holes. As of September 30, 2021, three drill holes totaling 861 meters, had been completed.

The Company continues to review and investigate the progression of its generative portfolio of properties including projects that have been returned from third parties.

## **SUMMARY OF QUARTERLY RESULTS**

The following table sets forth selected quarterly financial information prepared in accordance with IFRS for each of the Company's last eight quarters:

	<b>Q3</b>	<b>Q2</b>	<b>Q1</b>	<b>Q4</b>	<b>Q3</b>	<b>Q2</b>	<b>Q1</b>	<b>Q4</b>
	<b>2021</b>	<b>2021</b>	<b>2021</b>	<b>2020</b>	<b>2020</b>	<b>2020</b>	<b>2020<sup>(2)</sup></b>	<b>2019<sup>(2)</sup></b>
	<b>\$</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>
Total Revenue <sup>(1)</sup>	8,217	12,489	17,262	23,881	12,863	16,966	41,277	23,748
Net Loss	(820,184) <sup>(3)</sup>	(354,796)	(626,583)	(611,337)	(576,890)	(545,041)	(300,477)	(655,403)
Loss Per Share	(0.003)	(0.001)	(0.002)	(0.002)	(0.002)	(0.002)	(0.001)	(0.002)

<sup>(1)</sup> Revenue is derived from administration fees, interest income and recovery of IVA taxes.

<sup>(2)</sup> The Company recovered IVA from the Mexican tax authority, which is being booked to income directly.

<sup>(3)</sup> Costs related to the spinout of Kootenay Resources Inc.

## SELECTED ANNUAL INFORMATION

The financial statements have been prepared in accordance with IFRS for fiscal years 2020, 2019, and 2018, and are expressed in Canadian dollars.

<b>As at December 31:</b>	<b>2020</b>	<b>2019</b>	<b>2018</b>
Total Assets	\$ 94,403,123	\$ 87,144,393	\$ 76,468,720
Current Liabilities	366,933	367,945	625,279
Shareholders' Equity	94,036,190	86,776,448	75,843,441
Total Shareholders' Equity & Liabilities	\$ 94,403,123	\$ 87,144,393	\$ 76,468,720

<b>For the year ended December 31:</b>	<b>2020</b>	<b>2019</b>	<b>2018</b>
Total Revenue <sup>(1)</sup>	\$ 94,987	\$ 405,265	\$ 458,923
Net Loss <sup>(2)(3)</sup>	(2,033,745)	(1,999,208)	(2,466,422)
Basic and diluted loss per share	\$ (0.007)	\$ (0.008)	\$ (0.013)
Weighted average number of common shares outstanding	<b>291,265,510</b>	250,280,869	195,066,801

<sup>(1)</sup> Revenue is derived from administration fees, recovery of IVA taxes and interest income

<sup>(2)</sup> Net Loss for 2018 included \$213,324 in unrecovered exploration expense

<sup>(3)</sup> Net Loss for 2020 included non-cash share-based payments expense of 2020 - \$98,734; 2019 - \$285,161; 2018 - \$94,505.

## RISKS AND UNCERTAINTIES

The Company is in the business of acquiring, exploring mineral properties. It is exposed to several risks and uncertainties that are common to other mineral exploration companies in the same business. The industry is capital intensive at all stages and is subject to variations in commodity prices, market sentiment, exchange rates for currency, inflation and other risks. The Company currently has no source of revenue other than project management fees, and interest on cash balances. The Company will rely mainly on equity financing to fund exploration activities on its mineral properties.

The risks and uncertainties described in this section are not inclusive of all the risks and uncertainties to which the Company may be subject.

### Early Stage – Need for Additional Funds

The Company has no history of profitable operations and its present business is at an early stage. As such, the Company is subject to many risks common to other companies in the same business, including under-capitalization, cash shortages, and limitations with respect to personnel, financial and other resources and the lack of revenues. There is no assurance that the Company will be successful in achieving a return on shareholders' investment and the likelihood of success must be considered considering its early stage of operations.

The Company anticipates future expenditures will require additional infusions of capital; there can be no assurance that such financing will be available or, if available, will be on reasonable terms. If financing is obtained by issuing common shares from treasury, control of the Resulting Issuer may change, and investors may suffer additional dilution. Furthermore, if financing is not available, lease expiry dates, work commitments, rental payments and option payments, if any may not be satisfied and could result in a loss of the shareholders entire investment.

### Exploration and Development

Mineral exploration and development is a speculative business, characterized by several significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits, but also from finding mineral deposits that, though present, are of insufficient size and/or grade to return a profit from production.

All the mineral claims to which the Company has a right to acquire an interest or owns are in the exploration stages and are without a known body of commercial ore. Upon discovery of a mineralized occurrence, several stages of exploration and assessment are required before its economic viability can be determined. Development of the subject mineral

properties would follow only if favorable results are determined at each stage of assessment. Few precious and base metal deposits are ultimately developed into producing mines.

#### **Estimates of mineral resources may not be realized**

The mineral resource estimates contained in the Company's Technical Reports are only estimates and no assurance can be given that an identified resource will ever qualify as a commercially mineable (or viable) deposit, which can be legally and economically exploited. In addition, the grade of mineralization ultimately mined may differ from the one indicated by the drilling results and the difference may be material. Material changes in resources, grades and other factors, may affect the economic viability of projects.

#### **Earn-In agreements**

The Company continues to enter or seek to enter into separate option agreements with publicly listed companies on its various mineral properties. The terms of such option agreements vary but primarily optioning companies are granted an option to earn an ownership interest in an exploration property by making cash payments and or issuing shares to the Company and incurring exploration expenditures. These are not firm payments or expenditure commitments and are subject to these companies obtaining sufficient financing to fulfill their earn-in requirements. The agreements are also subject to termination if such payment and expenditure commitments are not fulfilled. On fulfillment of these commitments, the ownership arrangement and future development of the property will be subject to a joint venture agreement whereby the Company will be required to finance its proportionate share of exploration expenditures based on the ownership ratio of each of the parties. There is no certainty that any of these companies will complete the required expenditures on the properties to earn-in on the properties or that they will be able to obtain the necessary financing to complete the expenditure requirements in which case the costs of carrying and developing the properties will be the responsibility of the Company.

#### **Operating Hazards and Risks**

Mining operations involve many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. In the course of exploration, development and production of mineral properties, certain risks, and in particular unexpected or unusual geological operating conditions, including rock bursts, cave-ins, fires, flooding and earthquakes, may occur. Operations in which the Company has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production of mineral deposits, any of which could result in damage to or destruction of mines and other producing facilities, damage to life and property, environmental damage and possible legal liability for any or all damage.

Although the Company maintains liability insurance in an amount that it considers adequate, the nature of these risks is such that liabilities could exceed policy limits, in which event the Company could incur significant costs that could have a materially adverse effect upon its financial conditions.

#### **Political Risk**

The Company's advanced project and certain other property interests are located in Mexico and are subject to that jurisdiction's laws and regulations. Obtaining financing, finding or hiring qualified people or obtaining all necessary services for the Company's operations in Mexico may be difficult. The perception of Mexico may make it more difficult for the Company to attract investors or to obtain any required financing for its exploration projects. The Company believes the present attitude of the current Mexican government to foreign investment in the exploration and mining sector has become less supportive of the industry than previous governments. Investors should assess the political risks of investing in a foreign country. Variations from the current regulatory, economic and political climate could have an adverse effect on the affairs of the Company.

#### **Supplies, Infrastructure, Weather and Inflation**

The Company's property interests are often located in remote, undeveloped areas and the availability of infrastructures such as surfaces access, skilled labour, fuel and power at an economic cost cannot be assured. These are integral requirements for exploration, production and development facilities on mineral properties. Power may need to be generated on site.

Due to the partial remoteness of its exploration projects, the Company is forced to rely on the accessibility of secondary roads resulting in potentially unavoidable delays in planned programs and/or cost overruns. The rainy season in Mexico during the months of June through September can sometimes flood the main access road causing temporary delays.

### **Metal Prices**

The mining industry, in general, is intensely competitive and there is no assurance that a profitable market will exist for the sale of metals produced even if commercial quantities of precious and/or base metals are discovered. Factors beyond the control of the Company may affect the marketability of metals discovered. Pricing is affected by numerous factors beyond the Company's control, such as international economic and political trends, global or regional consumption and demand patterns, increased production and smelter availability. There is no assurance that the price of metals recovered from any mineral deposit will be such that they can be mined at a profit.

### **Title Risks**

Although the Company has exercised due diligence with respect to determining title to properties in which it has a material interest, there is no guarantee that title to such properties will not be challenged or impugned. The Company's mineral property interest may be subject to prior unregistered agreements, or transfers, or conflicting claims; or indigenous claims, and title may be affected by undetected defects.

### **Environmental Regulations, Permits and Licenses**

The Company's operations are subject to various laws and regulations governing the protection of the environment, exploration, development, production, taxes, labour standards, occupational health, waste disposal, safety and other matters. Environmental legislation in British Columbia, Canada and Mexico provides restrictions and prohibition on spills, releases or emissions of various substances produced in association with certain mining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. A breach of such legislation may result in imposition of fines, penalties and work stoppage. In addition, certain types of operations require the submission and approval of environmental impact statements. Environmental legislation is evolving in a direction of stricter standards and enforcement, and higher fines and penalties for non-compliance. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has the potential to reduce the profitability of operations. The Company intends to fully comply with all environmental regulations.

The current operations of the Company require permits from various government authorities and such operations are governed by laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental, mine safety and other matters.

The Company believes that it is in compliance with all material laws and regulations, which currently apply to its activities. There can be no assurance, however, that all permits which the Company may require for its operations and exploration activities will be obtainable on reasonable terms or on a timely basis or that such laws and regulations would not have an adverse effect on any mining project which the Company might undertake.

### **Competition and Agreements with Other Parties**

The mining industry is intensely competitive in all its phases, and the Company competes with other companies that have greater financial resources and technical capacity. Competition could adversely affect the Company's ability to acquire suitable properties or prospects in the future.

The Company may, in the future, be unable to meet its share of costs incurred under such agreements to which it is a party and it may have its interest in the properties subject to such agreements reduced as a result. Also, if other parties to such agreements do not meet their share of such costs, the Company may not be able to finance the expenditures required to complete recommended programs.

### **Economic Conditions**

Unfavorable economic conditions may negatively impact the Company's financial viability. Unfavorable economic conditions could also increase the Company's financing costs, decrease net income or increase net loss, limit access to capital markets and negatively impact any of the availability of credit facilities to the Company.

### **Dependence on Management**

The Company is very dependent upon the personal efforts and commitment of its existing management. To the extent that management's services would be unavailable for any reason, a disruption to the operations of the Company could result, and other persons would be required to manage and operate the Company.

### **Conflicts of Interest**

The Company's directors and officers may serve as directors or officers, or may be associated with, other reporting companies, or have significant shareholdings in other public companies. To the extent that such other companies may

participate in business or asset acquisitions, dispositions, or ventures in which the Company may participate, the directors and officers of the Company may have a conflict of interest in negotiating and concluding terms respecting the transaction. If a conflict of interest arises, the Company will follow the provisions of the Business Corporations Act (BC) (“Corporations Act”) dealing with conflict of interest. These provisions state that where a director has such a conflict, that director must, at a meeting of the Company’s directors, disclose his or her interest and refrain from voting on the matter unless otherwise permitted by the Corporations Act. In accordance with the laws of the Province of British Columbia, the directors and officers of the Company are required to act honestly, in good faith, and in the best interest of the Company.

### **Insurance coverage**

The mining industry is subject to significant risks that could result in damage to, or destruction of, mineral properties or producing facilities, personal injury or death, environmental damage, delays in mining, monetary losses and possible legal liability.

The Company’s policies of insurance may not provide sufficient coverage for losses related to these or other risks. The Company’s insurance does not cover all risks that may result in loss or damages and may not be adequate to reimburse the Company for all losses sustained. In particular, the Company does not have coverage for certain environmental losses or certain types of earthquake damage. The occurrence of losses or damage not covered by insurance could have a material and adverse effect on the Company’s cash flows, results of operation and financial condition.

### **Shareholder dilution**

The Company’s constituting documents permit the issuance of an unlimited number of common shares and a limited number of preferred shares issuable in series on such terms as the Directors determine without the approval of shareholders, who have no pre-emptive rights in connection with such issuances. In addition, the Company is required to issue common shares upon the conversion of its outstanding share purchase warrants and options in accordance with their terms. Accordingly, holders of common shares may suffer dilution.

### **Uninsurable risks**

In the course of exploration, development and production of mineral properties, certain risks and, in particular, unexpected or unusual geological operating conditions including cave-ins, fires, flooding and earthquakes may occur. It is not always possible to fully insure against such risks and the Company may decide not to take out insurance against such risks as a result of high premiums or other reasons. Should such liabilities arise, they could reduce or eliminate any future profitability and result in increasing costs and a decline in the value of the securities of the Company.

### **Coronavirus (COVID-19)**

There continues to be a global outbreak of COVID-19 (coronavirus), which has had a significant impact on businesses through the restrictions put in place by the Canadian and Mexican governments regarding travel, business operations and isolation/quarantine orders. At this time, it is unknown the extent of the impact the COVID-19 outbreak may have on the Company as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease, and the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place by Canada, Mexico and other countries to fight the virus. While the extent of the impact is unknown, we anticipate this outbreak may cause increased government regulations, business interruptions including future delays in implementing field work all of which may negatively impact the Company’s business and financial condition.

### **Disclosure Controls and Procedures**

Management is responsible for the preparation and integrity of the Financial Statements and maintains appropriate information systems, procedures and controls to ensure that information used internally and disclosed externally is complete and reliable. Management is also responsible for the design of the Company’s internal controls over financial reporting in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with IFRS.

Readers are cautioned that the Company is not required to certify the design and evaluation of its disclosure controls and procedures and internal controls over financial reporting and has not completed such an evaluation. The inherent limitations on the ability of the Company’s certifying officers to design and implement on a cost-effective basis disclosure controls and procedures and internal controls over financial reporting for the Company may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

## FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Company's financial instruments include cash and cash equivalents, receivables and advances, marketable securities, advances and deposits, accounts payable and accrued liabilities and termination benefit liabilities. The carrying values of these financial instruments approximate their fair values due to their relatively short periods to maturity and due to the insignificant carrying values of long-term financial instruments except for marketable securities, which are measured at fair value through other comprehensive income at each reporting period end.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities. The Company has exposure to credit risk, liquidity risk and market risk as a result of its use of financial instruments.

This note presents information about the Company's exposure to each of the above risks and the Company's objectives, policies and processes for measuring and managing these risks. Further quantitative disclosures are included throughout these financial statements. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board has implemented and monitors compliance with risk management policies.

### (a) Credit risk:

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's accounts receivable relates to receivables from exploration partners who are earning a right to the Company's property via earn-in option agreements, Goods and Services Tax input tax credits and IVA credits (Mexican Value added Tax refunds) from the Mexican Government. Accordingly, accounts receivable in the form of tax credits from Canada and Mexico are regarded with minimal risk and receivables from exploration partners are regarded with moderate risk by the Company.

### (b) Liquidity risk:

Liquidity risk is the risk that the Company will incur difficulties meeting its financial obligations as they are due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation.

The Company prepares annual expenditure budgets, which are regularly monitored and updated as considered necessary. To facilitate its expenditure program, the Company raises funds through private equity placements. The Company anticipates it will have adequate liquidity to fund its financial liabilities through future equity contributions.

As at September 30, 2021, the Company's financial liabilities were comprised of accounts payable and accrued liabilities, which have a maturity of less than one year.

### (c) Market risk:

Market risk consists of currency risk, commodity price risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits while maximizing returns.

#### (i) Currency risk:

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. Although the Company is considered to be in the exploration stage and has not yet developed commercial mineral interests, the underlying market prices in Canada for minerals are impacted by changes in the exchange rate between the Canadian, the United States dollar and the Mexican Peso. The Company's transactions are denominated in Canadian dollars, United States dollars and the Mexican Peso, the Company has not entered into any arrangements to hedge currency risk but does maintain cash balances within each currency with a predominate balance held in Canadian Dollars. Canadian dollars are exchanged when needed to meet foreign denominated liabilities.

The balances denominated in foreign currency are as follows:

	<b>September 30, 2021</b>	December 31, 2020
	<b>US\$</b>	US\$
Cash and cash equivalents	<b>174,658</b>	133,084
Trade accounts payable and accrued liabilities	<b>56,624</b>	17,318
	<b>Mexican Peso</b>	Mexican Peso
Cash and cash equivalents	<b>2,969,686</b>	738,443
Receivables and advances	<b>9,826,786</b>	6,041,058
Trade accounts payable and accrued liabilities	<b>77,631</b>	1,256,095

The Company has completed a sensitivity analysis to estimate the impact of the change in the foreign exchange rates on net loss for the year. The result of the sensitivity analysis shows a change in +/- 10% in the US Dollar and Mexican Peso exchange rate could have a collective impact of approximately +/- \$94,086 on the Company's net loss. This result arises primarily because the Company has Mexican Peso denominated cash accounts, accounts receivable and short-term liabilities. The actual results of a change in foreign exchange rates would depend on the foreign currency denominated assets and liabilities at the time and could cause the impact on the Company's results to differ from above.

(ii) Commodity price risk:

Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar, as outlined above. The Company is exposed to the price volatilities for precious and base metals that could significantly impact its future operating cash flow. As part of its routine activities, management is closely monitoring the trend of international metal prices.

(iii) Interest rate risk:

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The risk that the Company will realize a loss as a result of a decline in the fair value of cash and cash equivalents is limited because of their short-term investment nature. A variable rate of interest is earned on cash and cash equivalents, changes in market interest rates at the period-end would not have a material impact on the Company's financial statements.

## **OFF BALANCE SHEET ARRANGEMENTS**

The Company had no Off-Balance Sheet Arrangements.

## **TRANSACTIONS WITH RELATED PARTIES**

During the nine months ended September 30, 2021, officers of the Company charged management and consulting fees totaling \$360,000 (2020 - \$294,750) of which \$150,000 (2020 - \$150,000) has been allocated to deferred mineral property costs. These amounts were incurred in the ordinary course of business.

Effective January 1, 2008, the Company entered into a consulting agreement with Makwa Exploration Ltd. for the services of James McDonald to act as the Company's President and CEO. The base monthly fee for Makwa was amended effective January 1, 2017 to \$20,833. The consulting agreement extends in increments of 24 months, until terminated.

Effective September 1, 2008, the Company entered into an administrative and geological services agreement with a private company indirectly related to two common directors (Messrs McDonald and Berry), which provides services to the Company including assisting in professional analysis, geological personnel, planning of exploration programs, promotional materials; providing access to financial and secretarial services and providing such other additional instructions and directions as the Company may require. For the nine months ended September 30, 2021, the Company incurred expenses \$90,000 (2020 - \$90,000) under the administrative services contract.

In addition to the above:

- a) Included in marketable securities as at September 30, 2021 is \$111,666 (2020 - \$300,000) market value of shares received from companies with directors in common.
- b) Included in accounts receivable as at September 30, 2021 is \$Nil (2020 - \$9,045) from companies who have common directors or officers.

## **FUTURE ACCOUNTING STANDARDS**

### **Critical Accounting Estimates**

Please refer to Note 3 of the Company’s Audited Financial Statements for the year ended December 31, 2020, for additional information under “Significant Accounting Policies”.

Significant areas requiring the use of management estimates include the collectability of amounts receivable, balances of accrued liabilities, the fair value of financial instruments, the rates for depreciation of property and equipment, the recoverability of mineral property interests, determination of estimates of deferred tax assets and liabilities, and the determination of variables used in the calculations of share-based payments. While management believes that these estimates are reasonable, actual results could differ from those estimates and could impact future results of operations and cash flows.

## **OTHER MD&A REQUIREMENTS**

### **Additional Disclosure for Venture Companies without Significant Revenues**

## Disclosure Controls and Procedures

Management is responsible for establishing and maintaining disclosure controls and procedures and internal control over financial reporting for the Company. Based on an evaluation of the Company's disclosure controls and procedures as of the end period covered by this MD&A, management believes such controls and procedures are effective in providing reasonable assurance that material items requiring disclosure are identified and reported in a timely manner.

## Cautionary note regarding preparation of Mineral Reserves and Resources

This MD&A uses the terms "reserves" and "resources" and derivations thereof. These terms have the meanings set forth in Canadian National Instrument 43-101 - Standards of Disclosure for Mineral Projects (NI 43-101) and the Canadian Institute of Mining, Metallurgy and Petroleum's Classification System (CIM Standards). NI 43-101 and CIM Standards may differ significantly from the requirements of the United States Securities and Exchange Commission (the SEC). Accordingly, information concerning descriptions of mineralization and resources contained in this Management's Discussion and Analysis may not be comparable to information made public by US domestic companies subject to the reporting and disclosure requirements of the SEC.

## Approval

This MD&A has been prepared by management with an effective date of November 9, 2021. The MD&A and the Consolidated Interim Financial Statements were approved by the Audit Committee of the Company as authorized by the Board of Directors of the Company on November 18, 2021.
